Strengths and Improvement Areas

Environment

Weight ●●●●

Strengths

Policies

Strengths

Endorsement of the CEO Water Mandate initiative

Quantitative objectives set on materials, chemicals & waste

Quantitative objectives set on energy consumption & GHGs

Environmental policy on customer health & safety

Environmental policy on materials, chemicals & waste

Environmental policy on water

Environmental policy on energy consumption & GHGs

Comprehensive policy on a majority of environmental issues

Endorsement of external initiative on environmental issues [World Business Council for Sustainable Development (WBCSD), Responsible Care via American Chemistry Council (ACC) [USA]]

Endorsement of the Responsible Care Global Charter

Endorsement of the United Nations Global Compact (UNGC)

Actions

Strengths

Other actions to reduce energy consumption/GHG emissions

Use of alternative, less hazardous substances in operations

Use of recovered input materials

Use of eco-friendly or bio-based input materials

Specialized treatment and safe disposal of hazardous substances

Environmental emergency measures in place

Reduction of material consumption through process optimization

Mapping of waste streams

Internal sorting & disposal of waste according to waste streams

Actions or training to raise employee awareness on waste reduction & sorting

Reduction of internal wastes through material reuse, recovery or repurpose

Work processes or technologies implemented to mitigate emissions of VOC, SO2, NOx or heavy metals
Control measures to prevent contamination of groundwater
Wastewater quality assessment
On-site or off-site wastewater treatment facilities
Water-stress assessment or mapping performed to identify exposure to water-related risks
Water accounting or auditing performed
Fuel switch to achieve higher energy efficiency and/or lower carbon emission intensity
Training of employees on energy conservation/climate actions
Purchase and/or generation of renewable energy
Company-specific emergency preparedness and response procedure regarding customer health and safety
Purchase of verified carbon offset credits
Improvement of energy efficiency through technology or equipment upgrades
RC14001 certified
RCMS (Responsible Care Management System) certified
Provision of Safety Data Sheets (SDS)
Technologies or practices to recycle or reuse water
Energy and/or carbon audit
Registration of substances to the ECHA
Formalized process in place to assess and document risks related to customer health and safety
Formalized process in place to assess and document environmental risks
Use of waste heat recovery system(s) or combined heat and power unit(s)
Periodical analysis on the volumes of major air pollutants or ambient air quality monitoring (testing levels of PM, NOx, SO2, VOC or heavy metals)
Training employees to safely handle and manage hazardous substances
Company-specific research on potential health impacts of products/services
Provision of safety data sheets (SDS) adapted for the REACH regulation
Actions for labeling, storing, handling and transporting hazardous substances
Measures to reduce pollutants discharged to water
Recall procedure in place

Company awareness program for customers on health & safety issues associated with products/services

Reduction of water consumption through innovative equipments, methods or technologies

Results

Strengths

Reporting on total gross Scope 3 downstream GHG emissions

Reporting in accordance with SASB

Reporting in accordance with GRI Standards (option "Core")

Reporting on total weight of waste recovered

Reporting on total amount of renewable energy consumed

Reporting on total water consumption

Reporting on total weight of non-hazardous waste

Reporting on total weight of hazardous waste

Reporting on total gross Scope 3 GHG emissions

Materiality analysis in sustainability reporting

External assurance of sustainability reporting

Company communicates progress towards the Sustainable Development Goals (SDGs)

Reporting on scope 2 GHG emissions

Reporting on scope 1 GHG emissions

Company reports to CDP

Reporting on total energy consumption

Comprehensive reporting on environmental issues

Improvement Areas

Policies

Priority

Improvement Areas

Low

Inconclusive documentation for policies on air pollution

Actions

Priority

Improvement Areas

Medium

Unclear percentage of ISO 14001 certified sites

Results

Priority Improvement Areas

Medium

The 360° Watch has identified at least one significant controversy, fine or penalty regarding environmental issues in the last five years (see news with red downward arrow in the 360° Watch section).

Medium

The 360° Watch has identified at least one significant adverse report regarding materials, chemicals and/or waste.

Low

No information related to reporting on total weight of pollutants emitted to water

Low

No information related to whether any sites/operations are located in or near biodiversity-sensitive areas

Labor & Human Rights

Weight ●●●●

Strengths

Policies

Strengths

Endorsement of the CEO Action for Diversity & Inclusion Commitment

Labor & human rights policy on diversity, equity & inclusion

Labor & human rights policy on child labor, forced labor & human trafficking

Labor & human rights policy on career management & training

Labor & human rights policy on social dialogue

Labor & human rights policy on working conditions

Labor & human rights policy on employee health & safety

Standard policy on a majority of labor or human rights issues

Health and safety policy also covers subcontractors working on the company premises

Endorsement of external initiative on labor or human rights issues [Responsible Care via American Chemistry Council (ACC) [USA]]

Endorsement of the Responsible Care Global Charter

Endorsement of the United Nations Global Compact (UNGC)

Actions

Strengths

Family Friendly programs (FFPs) implemented (e.g. parental or care leaves, childcare services or allowances)

Women development, mentorship, and/or sponsorship programs in place

Affinity or other support groups for minorities/vulnerable groups

Actions to prevent workplace harassment

Actions to prevent discrimination in professional development and promotion processes

Collective agreement in place
Compensation for extra or atypical working hours
Employee stock ownership plan (not restricted to executive level)
Employee satisfaction survey
Bonus scheme related to company performance
Flexible organization of work (eg. remote work, flexi-time)
Health care coverage of employees in place
Awareness training on child labor, forced labor and human trafficking
RC14001 certified
RCMS (Responsible Care Management System) certified
Grievance mechanism on discrimination and/or harassment issues
Actions to promote wage equality in the workplace
Awareness training regarding diversity, discrimination, and/or harassment
Formalized process in place to assess and document risks related to employee health and safety
Training on health and safety issues for subcontractors working on the company premises
Internal audits on health & safety issues
Provision of protective equipment to all impacted employees
Employee health & safety detailed risk assessment
Transparent recruitment process communicated clearly and formally to all candidates
Actions to prevent discrimination during recruitment phase
Grievance mechanism on child labor, forced labor and/or human trafficking issues
Regular assessment (at least once a year) of individual performance
Active preventive measures for stress and noise
Health & safety procedures translated in major languages spoken by employees
Mandatory health check-up for employees
Official measures promoting career mobility
Provision of skills development training
Joint labor management health & safety committee in operation

Actions to promote the inclusion of employees with disabilities

Setting of individual career plan for all employees

Training of relevant employees on health & safety risks and best working practices

Results

Strengths

Reporting on the percentage of workers from minority groups and/or vulnerable workers employed in relation to the whole organization

Reporting on the percentage of women employed in relation to the whole organization

Reporting in accordance with SASB

Reporting in accordance with GRI Standards (option "Core")

Report on average unadjusted gender pay gap

Report on percentage of women within the organization's board

Reporting on average training hours per employee

Reporting on the percentage of workers from minority groups and/or vulnerable workers in top executive positions

Materiality analysis in sustainability reporting

External assurance of sustainability reporting

Company communicates progress towards the Sustainable Development Goals (SDGs)

Reporting on the percentage of women in top executive positions

Comprehensive reporting on labor and human rights issues

Reporting on accident severity rate

Reporting on accident frequency rate

Improvement Areas

Policies

Priority Improvement Areas

Low

No quantitative target on labor and human rights issues

Actions

Priority Improvement Areas

High

Supporting documentation demonstrates a low level of coverage of labor and human rights actions throughout the company operations/workforce

Low

Declares that workers' rights to join labor unions, workers' councils, or other collective bargaining organizations are granted, but are restricted in compliance with applicable law

Low

Does not declare special remuneration or time off for overtime work throughout the entire scope of operations

Low	Does not declare that employees receive 24 hours rest within a time frame of 7 consecutive days throughout the entire scope of operations
Low	Does not declare paying employees at least statutory minimum wages throughout the entire scope of operations
Results	
Priority	Improvement Areas
Medium	The 360° Watch has identified at least one significant controversy, fine or penalty regarding labor and human rights issues in the last five years (see news with red downward arrow in the 360° Watch section).
Medium	The 360° Watch has identified at least one significant adverse report regarding employee health & safety.

 Ethics Weight ●●●●	
Strengths	
Policies	
Strengths	
	Policy on fraud
	Policy on conflict of interest
	Disciplinary sanctions to deal with policy violations
	Employee signature acknowledgement of ethics policies
	Policy on information security
	Policies on corruption
	Exceptional policy on ethics issues
	Policy on anticompetitive practices
	Dedicated responsibility for ethics issues
	Endorsement of external initiative on ethics issues [World Economic Forum (WEF) Partnering Against Corruption Initiative (PACI)]
	Endorsement of the United Nations Global Compact (UNGC)
Actions	
Strengths	
	Whistleblower procedure for stakeholders to report information security concerns
	Whistleblower procedure for stakeholders to report anti-competitive practices
	Whistleblower procedure for stakeholders to report corruption and bribery
	RC14001 certified
	RCMS (Responsible Care Management System) certified
	Incident response procedure (IRP) to manage breaches of confidential information

Implementation of a records retention schedule

Information security risk assessments performed

Awareness training to prevent information security breaches

Provision of competitor interaction guidelines to key employees

Measures to protect third party data from unauthorized access or disclosure

Measures for gaining stakeholder consent regarding the processing, sharing and retention of confidential information

Audits of control procedures to prevent corruption

Awareness training performed to prevent corruption

Specific approval procedure for sensitive transactions (e.g. gifts, travel)

Audits of control procedures to prevent anticompetitive practices

Results

Strengths

Reporting in accordance with SASB

Reporting in accordance with GRI Standards (option "Core")

Materiality analysis in sustainability reporting

External assurance of sustainability reporting

Company communicates progress towards the Sustainable Development Goals (SDGs)

Improvement Areas

Actions

Priority Improvement Areas

High

Supporting documentation demonstrates a low level of coverage of ethics actions throughout the company operations

High

No conclusive documentation regarding corruption risk assessments

High

No conclusive documentation regarding risk assessments for anti-competitive practices

Low

No conclusive documentation regarding an anti-corruption due diligence program on third parties

Results

Priority Improvement Areas

High

No conclusive reporting on ethics issues

Medium

The 360° Watch has identified at least one significant controversy, fine or penalty regarding ethics issues in the last ten years (see news with red downward arrow in the 360° Watch section).

Medium

The 360° Watch has identified at least one significant adverse report regarding anti-competitive practices.

Strengths

Policies

Strengths

Endorsement of the Together for Sustainability (TfS) initiative

Endorsement of the CEO Water Mandate initiative

Endorsement of the Responsible Minerals Initiative (RMI, formerly CFSI)

Policy on conflict minerals issues

Comprehensive sustainable procurement policies on both social and environmental factors

Actions

Strengths

Global supplier diversity program in place

Actions to advance diversity, equity and inclusion in the workforce of suppliers

Actions to work with businesses owned by minorities/vulnerable groups in the supply chain

Actions to work with women-owned businesses in the supply chain

50-100% of suppliers for which conflict minerals information is available (e.g. CMRT)

Performing suppliers on environmental and social issues have access to unique incentives (e.g. supplier awards, preferred supplier program, access to RFPs)

Supplier sustainability code of conduct in place

Grievance mechanism allowing any interested parties to voice and record concerns on conflict minerals

Selected suppliers required to fill Conflict Minerals Reporting Template (CMRT)/other customized conflict mineral-related questionnaire

Investigation or traceability system of the supply chain (smelters, trades, mines) on conflict minerals due diligence (e.g. third party on site audit in place)

Formal assessment of suppliers' progress with regards to REACH requirements

Capacity building of suppliers on environmental or social issues (e.g. corrective actions, training)

On-site audits of suppliers on environmental or social issues

Regular supplier assessment (e.g. questionnaire) on environmental or social practices

Training of buyers on social and environmental issues within the supply chain

Integration of social or environmental clauses into supplier contracts

Sustainability risk analysis (i.e. prior to supplier assessments or audits)

Results

Strengths

Reporting on total gross Scope 3 upstream GHG emissions

Reporting in accordance with SASB
Reporting in accordance with GRI Standards (option "Core")
Materiality analysis in sustainability reporting
External assurance of sustainability reporting
Company communicates progress towards the Sustainable Development Goals (SDGs)
Publication of a SD form or/and Conflict minerals report as per SEC requirements
Standard reporting on sustainable procurement issues
Improvement Areas
Actions
Priority Improvement Areas
High No supporting documentation on the coverage of sustainable procurement actions throughout the company supplier base/operations

360° Watch Findings

<p>10 Nov 2022 https://edition.cnn.com/20...</p> <p>Impact on score Neutral →</p> <p>Impacted themes </p> <p>California sues 3M, DuPont over toxic 'forever chemicals'</p> <p>California's attorney general on Thursday sued 3M Co (MMM.N), DuPont de Nemours Inc (DD.N) and several other companies to recoup the "staggering" clean-up costs from toxic pollutants known as "forever chemicals." Attorney General Rob Bonta said the lawsuit followed a multiyear probe that found the companies marketed products containing polyfluoroalkyl and perfluoroalkyl substances (PFAS) for decades despite knowing they cause cancer, developmental defects and other health problems. Bonta said the lawsuit could ultimately seek hundreds of millions of dollars in penalties and costs.</p>	<p>22 Sep 2022 https://www.bunkerspot.com...</p> <p>Impact on score Neutral →</p> <p>Impacted themes </p> <p>Cargo Owners for Zero Emission Vessels more than doubles signatories to 2040 Ambition Statement</p> <p>The Cargo Owners for Zero Emission Vessels (coZEV) has informed Bunkerspot that the number of global brands signed up to its 2040 Ambition Statement to accelerate maritime shipping decarbonisation has now more than doubled to 19. In a statement sent to Bunkerspot today, coZEV said that the new members are: Beiersdorf, Dupont, Electrolux, ETTLI Kaffee, Moose Toys, Ohana Beverage Company, Philips, REI Co-op, Sisley, and Target.</p>	<p>20 Sep 2022 https://mynews1a.com/busin...</p> <p>Impact on score Neutral →</p> <p>Impacted themes </p> <p>Community Services District Sues Big Chemical Makers over Contaminants</p> <p>The Jurupa Community Services District has joined thousands of other entities nationwide in suing DuPont, 3M Company and other manufacturers whose chemical products have turned up in public water systems, exposing consumers to contamination threats, according to the plaintiffs. According to published reports, nearly 6,500 government entities and other plaintiffs have filed civil actions against the chemical makers. The suits are being consolidated by a federal judge in South Carolina.</p>

23 Places Where Industrial Air Pollution is So Bad It Causes Cancer

Bordering Louisiana, this oil industry county has multiple petrochemical and chemical facilities including Invista Sarl and DuPont's Sabine River Works, the latter of which releases 12 known carcinogens and recently settled with the EPA after numerous violations of both the Clean Air Act and the Clean Water Act. International Paper's Orange Mill in the northwest corner of the county is another producer of toxic air pollution including hydrogen sulfide and formaldehyde.

More than 8 million Illinoisans get drinking water from a utility where forever chemicals have been detected, Tribune investigation finds

The testing at Criswell Court and in other Illinois communities highlights a health and environmental disaster that keeps expanding worldwide as scientists and government officials search for PFAS in water, soil and air. The Tribune identified 1,654 potential sources of PFAS statewide through a national analysis of industry codes that designate the type of products manufactured or used at a particular factory. Only California, Virginia, Pennsylvania and Florida have more facilities on the list of suspected polluters. More than 60% of the Illinois facilities are in Chicago and its suburbs, the analysis found, but 85 of the state's 102 counties have at least one potential source of the chemicals.

State sues chemical companies for pollution from 'forever chemicals'

More than a dozen large manufacturing companies are responsible for millions of dollars in damages to communities across Massachusetts for "knowingly contaminating" drinking water sources, groundwater, and other natural resources with toxic chemicals that threaten the public health and the environment, Attorney General Maura Healey alleged in a lawsuit. The complaint, filed Tuesday in a federal court in South Carolina, alleges that 15 companies violated state and federal laws that protect drinking water and prohibit consumer deception by marketing, manufacturing, and selling a foam widely used to fight liquid fires that contained toxic PFAS chemicals to residents, local fire departments, businesses, and a range of government entities throughout Massachusetts.

Dane County Sues Foam Makers Over PFAS Pollution

Dane County officials are suing dozens of firefighting foam manufacturers alleging their products contaminated the area around the county's airport. The Wisconsin State Journal reported Tuesday that the county is seeking unspecified damages from dozens of companies, including DuPont, 3M and Johnson Controls. The county alleges the manufacturers sold foam for decades despite knowing it contained PFAS and failed to warn consumers and the public of the chemicals' dangers. Court records indicate the county filed the lawsuit on April 26.

U.S. EPA Final Order With Penalty against E I DUPONT DE NEMOURS - LA PORTE PLANT, TX, facility

The proposed Consent Decree resolves Resource Conservation and Recovery Act (RCRA) violations concerning the identification, treatment, storage and disposal of hazardous waste, non-compliance with the Clean Water Act (CWA) requirements to implement secondary containment for oil-containing transformers and Clean Air Act (CAA) violations of the National Emission Standards for Organic Hazardous Air Pollutants for Pesticide Active Ingredients Production. The bulk of the violations stemmed from the company's chemical manufacturing operations and affected some of the wastewater treatment units. However, DuPont ceased chemical manufacturing operations at La Porte in 2014 and currently only operates the wastewater treatment system for tenant operators. Under the proposed settlement, DuPont has agreed to pay a state/local penalty of \$1,710,000 and a total compliance cost of \$138,000.

U.S. EPA Final Order With Penalty against FILMTEC CORPORATION, MN, facility

EPA and FilmTec have reached a settlement agreement to resolve alleged violations of the Clean Air Act at FilmTec's water filter manufacturing plant in Edina, MN. The terms include injunctive relief and a cash penalty of \$250,000. FilmTec owns and operates a campus in Edina, Minnesota, for the manufacture of water filtration products, primarily reverse-osmosis filters for domestic and commercial use. The facility operates under a Title V Permit with a facility-wide emission limit for volatile organic compounds (VOC) of 235 tons per year (tpy), making it a synthetic minor source under the program for the Prevention of Significant Deterioration of Air Quality (PSD). EPA alleges that FilmTec violated provisions of its Title V Permit by exceeding its facility-wide VOC limit and that FilmTec violated provisions of the PSD program by commencing constructing of a major modification to a major stationary source without first obtaining a PSD permit. In addition, EPA alleges that FilmTec did not use the method required by its Title V Permit to show continuous compliance with emissions limits for VOCs and Hazardous Air Pollutants (HAPs). These violations caused excess emissions of VOC, which contributes to ground level ozone. Ground level ozone irritates the human respiratory system and reduces lung function. Under the agreement, Filmtec will: (1) move production from uncontrolled Lines 200 and 300 to the newer, and well-controlled line 600, followed by decommissioning of lines 200 and 300, with no reduction or restriction on production; (2) perform comprehensive emission testing at all 29 emission points from the main process lines in order to accurately measure emissions; and (3) request permit modifications to accurately characterize emissions from all emission points going forward. Properly quantifying emissions is an existing regulatory requirement. FilmTec will pay a civil penalty of \$250,000.
