DuPont® Tyvek® Wrap Cap screws are designed to provide optimal holding power when securing DuPont® Tyvek® weather barriers to steel studs in commercial buildings.

**Features and benefits**

**2” DuPont® Tyvek® Wrap Caps**
- Constructed of high-density polyethylene with UV inhibitors
- Increases fastener holding power, reducing the potential for job-site blow-off of weather barrier
- Provides additional protection around fastener penetrations
- Offers easy handling and installation

**1¾” steel stud screw**
- Self-tapping drill point screw
- Coated with an organic fluoropolymer for improved rust protection
- Can be applied by hand or drill
- Core-attached to DuPont® Tyvek® Wrap Caps for quick installation
- Drill bit included in each box for ease of installation
Product specifications
DuPont® Tyvek® Wrap Cap screws

- Cap diameter: 2"
- Cap material: high-density polyethylene w/UV inhibitors
- Cap color: white
- Application: hand or drill
- Screw: #8 shank; 1¾” length; coated galvanized steel; modified truss head; Phillips draw
- Box count: 2000
- Box weight: 14.5 lbs
- Box dimensions: 12” x 12” x 14”

Recommended fastener spacing and negative wind load resistance according to ASTM E330*

Complete system of products
For optimal protection on all your building projects, use DuPont® Tyvek® Wrap Caps with DuPont® Tyvek® Weather Barrier Systems including DuPont® Tyvek® CommercialWrap®, DuPont® Tyvek® StuccoWrap®, DuPont® Flashing Systems and DuPont® Tyvek® Tape.

Our Specialist Network
The DuPont® Tyvek® Specialist Network is an elite team of more than 180 highly-trained field representatives, including 30 who are focused specifically on commercial building applications. From the latest updates on building codes, to keeping up with current trends and challenges, your local DuPont® Tyvek® Specialist can provide on-site consulting and training to help make sure the job gets done right.
