

## TOGETHER WE CAN SOLVE THE WORLD'S GREATEST CHALLENGES

The solution to many of the most fundamental challenges facing the world today can be found in science. But providing for the food, energy and safety needs of a growing population will require more than science alone. It will require many people working together to devise solutions that improve the lives of people everywhere. DuPont has a rich history of scientific discovery that has enabled countless innovations and today, we're looking for more people, in more places, to collaborate with us to make life the best that it can be.

### European Operations Field Program

#### Job description:

***The objective of the Operations Field Program is to develop a diverse group of high potential employees in Operations (Manufacturing, Engineering, Supply Chain, Safety Management) for leadership positions.***

We are looking for individuals with leadership potential who are at their early stage and have the capability to make a significant difference to the current and the future performance of DuPont. Applications from female candidates are especially welcome.

The European Operations Field Program lasts from 5 to 6 years. As a regular employee of DuPont, you will work in three different businesses, in at least three different assignments (Quality Engineer, Process Engineer, Project Engineer, Shift Supervisor). At the end of the program, you will have been trained for a Six Sigma Black Belt Certification or for a Lean Certification. You will have the possibility to be assigned in the following countries: Spain, Luxembourg, Germany, The Netherlands, Belgium, UK, France, Denmark and Finland.

The target position at the end of the program is a managerial position in Operations.

#### Your profile:

- University degree in Mechanical, Electrical, Environmental, Process, Chemical or Bio Engineering, Food Technology or university degree with a focus in supply chain.
- Fluency in English and in two other European languages: German, Dutch, Danish or Finnish would be an asset.
- 0-2 years of work experience.
- Technical competence proven by internships or first assignment.
- Flexible and mobile at a European level.
- Proven record of self-development and active learning.
- Strong customer focus.
- Planning and organizing skills.
- Able to influence and negotiate.
- Proven interpersonal sensitivity and skills.
- High level of communication skills.
- High level of personal motivation.
- Demonstrated leadership skills.
