

REACH Compliance

Position of DuPont for KEVLAR[®] and NOMEX[®] Categories: Engineered Elastomers

For other categories : Staple, Yarn, Paper, Pulp, Floc, Fabric, etc.,
please refer to the bulletin on Articles

At DuPont, Product Stewardship is an important aspect of our supply chain relationships. We maintain an unwavering commitment to safety for our employees, our contractors, and the communities in which we operate and we share that concern for all who handle our products. As both a manufacturer and importer/exporter of substances¹ covered under REACH, DuPont has established a team to address all of the requirements as they apply to our suppliers, our customers, and our own operations.

The purpose of this communication is to inform you of our current plans:

- DuPont is ensuring that all products sold to our EU and EEA customers by DuPont legal entities in Europe² are in compliance with REACH regulatory requirements, including (pre-)registration³.
- DuPont does not intend to communicate REACH pre-registration numbers based on guidance in CEFIC REACH Industry Preparation Letter No 9.
- REACH registration numbers will be communicated via the safety data sheet for preparations, though a transition period has been granted which will end on 30 November 2012

REACH requires registration for individual substances (on their own or in preparations⁴) greater than 1 metric ton per year produced or imported.

Each importer is responsible for its own compliance with REACH.

The product we sell to you to our current knowledge does not contain substances above the legal threshold that are on the Candidate List of Substances of Very High Concern (SVHC) as published on the ECHA website website - latest on 17.12.2015.

To our current knowledge, all substances contained in the above preparations are in compliance with the conditions of restrictions of REACH Annex XVII. DuPont will communicate in due course any changes due to future amendments of Annex XVII that may impact the manufacture, placing on the market or use of the substances contained.

To understand fully the obligations that you will have under REACH, we recommend that you consult the REACH web site at <http://echa.europa.eu>. DuPont REACH web site: <http://reach.dupont.com>

¹ Substance: a chemical element and its compounds in the natural state or obtained by any manufacturing process, including any additive necessary to preserve its stability and any impurity deriving from the process used, but excluding any solvent which may be separated without affecting the stability of the substance or changing its composition (REACH, Art. 3.1).

² This includes the DuPont legal entities in the EU/EEA, as well as, DuPont de Nemours International S.A. and DuPont International Operations Sàrl.

³ DuPont, for its products and brands, has submitted (pre-)registration files to ECHA for the substances requiring (pre-)registration that are manufactured/imported by DuPont. Receipt of those files has been acknowledged by ECHA. As per today's knowledge, the substances that DuPont is purchasing on the European market have been (pre-)registered by their respective manufacturers or importers.

⁴ Preparation: means a mixture or solution composed of two or more substances (REACH, Art. 3.2).

This information is based on our current level of knowledge and expresses only our intention. It does not constitute a binding obligation. Whilst the information is provided in good faith, no representations or warranties are made with regards to its completeness or accuracy and no liability will be accepted for damages of any nature whatsoever resulting from the use of or reliance on the information.
