

## **SILVER WINNER – 2015 DUPONT AWARDS FOR PACKAGING INNOVATION**

### **Transportation Packaging – Now Stronger and More Responsible**

*Compadre, LLC – USA*

Parcel and freight shipping is now more sustainable with the introduction of the Kübox easy crating system. This paper-based crate fills the need when customers want something lighter, less expensive and easier to use than the traditional wooden crates or plastic cases, but a corrugated box is not enough.

With half the weight of a wood crate and compression strength of over 5,000 pounds, the Kübox is both very light and very strong. Through innovative design, the Kübox can be easily and safely assembled/disassembled without tools and can be shipped/stored flat, saving on space, labor, and transportation costs.

The strength and durability of the Kübox ensure that the contents, from gallery artwork to aircraft engines, stay safe throughout delivery. After delivery, the Kübox can be reused in a variety of ways, most often as furniture and storage by consumers and for repetitive, out and back shipments by businesses.

***Honored for Excellence in Responsible Packaging***
