

THE DUPONT SAFETY & SUSTAINABILITY AWARDS 2017

Has your company made improvements that have made a lasting effect on your safety, sustainability or operational performance?

If so, we'd like to hear from you.

The DuPont Safety and Sustainability Awards 2017 celebrate organizations of all sizes from around the world that have found innovative ways of making an enduring difference to the safety and health of their workers, to the environment and to productivity. With a growing world population, limited natural resources and consumers who take a greater interest in the provenance of goods, companies have had to come up with innovative approaches to the way they operate. By sharing their examples and recognizing their achievements, the Awards, sponsored by DuPont Sustainable Solutions, hope to drive change and promote best practice in safety, sustainability and operational excellence.

In 2017, the 13th DuPont Safety and Sustainability Awards will honor the most innovative projects that have achieved long-term benefits in three categories:

THE DUPONT SAFETY AWARD

for innovative solutions that have lead to significant, permanent advances in safety performance

THE DUPONT OPERATIONAL EXCELLENCE AWARD

for continuous, sustainable improvements in operating efficiencies and asset uptime, improved quality, consistency

THE DUPONT SUSTAINABILITY AWARD

for lasting changes that benefit the environment

DuPont Sustainable Solutions

THE DUPONT SAFETY & SUSTAINABILITY AWARDS 2017

ENTRY CRITERIA

If your company has introduced a safety or sustainability program, or new operational management techniques that have achieved significant, enduring results, tell us about them by sending us a short summary before April 23, 2017.

Application forms and further information are available from the independent organizing committee at www.dssa.dupont.com or via email from dssa@nexdor.ch.

Winners of the DuPont Safety & Sustainability Awards 2015, pictured with Ellen Kullman, CEO and Chair of the Board, DuPont.

A jury of experts drawn from the ILO, IOSH, the UK trade magazine Health & Safety at Work, and different companies including DuPont, will evaluate projects according to criteria such as management involvement, cultural evolution, performance improvement, innovation and stakeholder engagement. All applications should demonstrate measurable results and improvements that can be gauged through defined key performance indicators.

Since its launch in 2002, the biannual DuPont Safety and Sustainability Awards competition has grown to become a global event attracting entries from a wide range of industries and countries (from France to Germany, Italy, Kazakhstan, Saudi Arabia, Turkey and the United Arab Emirates). It has become a widely-recognized industry benchmark for clean, green and lean operations.

Final project entries should be submitted by May 31, 2017.

The DSS Awards are sponsored by DuPont Sustainable Solutions, a leading provider of world-class operations management consulting services. For more than 40 years, DuPont Sustainable Solutions has helped companies in high-risk industries around the world reduce injuries, increase productivity and outpace benchmarks to drive sustainable bottom-line performance.
