

Say Hello to Advanced Weed Control

DuPont™ FeXapan™
herbicide Plus VaporGrip®
Technology

If you plant Roundup Ready 2 Xtend® soybeans, you now have another option for controlling herbicide-resistant broadleaf weeds.

DuPont™ FeXapan™ herbicide Plus VaporGrip® Technology is a next-generation, low-volatility dicamba herbicide.

VaporGrip® Technology significantly reduces dicamba acid (the volatile form of dicamba) from forming in the spray droplet.

Protect Fields and Yield

FeXapan™ herbicide Plus VaporGrip® Technology knocks out the toughest broadleaf weeds, even those resistant to glyphosate — including marestail, kochia, waterhemp and Palmer amaranth.

It adds a complementary site of action to your weed control program. And you can tank-mix it with other qualified herbicides, providing more sites of action for weed-free acres all season long. **Find all qualified tank-mix partners at [FeXapanApplicationRequirements.DuPont.com](https://www.duPont.com/FeXapanApplicationRequirements).**

Grow Performance and Savings

The TruChoice® platform makes FeXapan™ herbicide Plus VaporGrip® Technology an even stronger weed management option.* TruChoice offers competitive financing and maximum savings — especially when you bundle your purchase of FeXapan™ herbicide Plus VaporGrip® Technology with other qualifying seed and crop protection products. **Ask your local sales representative to help you find the best performance and savings for every acre.**

Resources

Visit the websites below for additional information on how to get better results with DuPont™ FeXapan™ herbicide Plus VaporGrip® Technology. Or contact your local sales representative.

FeXapan.DuPont.com

Complete the required dicamba herbicide training online to become a certified applicator for approved restricted-use pesticide dicamba products (if online training is acceptable in your state).

FeXapanApplicationRequirements.DuPont.com

Before application, read the most up-to-date label requirements — including qualified tank-mix partners and nozzles. You'll also find other tools for effectively using the product, keeping application records and more.

*TruChoice programs not available in all geographies. Check program details in your area.

DuPont™ FeXapan™ herbicide Plus VaporGrip® Technology is a restricted-use pesticide. For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's certification.

DuPont™ FeXapan™ herbicide Plus VaporGrip® Technology is not registered for sale or use in all states. Contact your local DuPont representative for details and availability.

DO NOT APPLY DICAMBA HERBICIDE IN-CROP TO SOYBEANS WITH Roundup Ready 2 Xtend® technology unless you use a dicamba herbicide product that is specifically labeled for that use in the location where you intend to make the application. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO MAKE AN IN-CROP APPLICATION OF ANY DICAMBA HERBICIDE PRODUCT ON SOYBEANS WITH Roundup Ready 2 Xtend® technology, OR ANY OTHER PESTICIDE APPLICATION, UNLESS THE PRODUCT LABELING SPECIFICALLY AUTHORIZES THE USE. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with soybeans with Roundup Ready 2 Xtend® technology.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Soybeans with Roundup Ready 2 Xtend® technology contain genes that confer tolerance to glyphosate and dicamba. Glyphosate herbicides will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba.
