

For burndown and residual weed control
in a LibertyLink soybean program

DuPont™ Canopy® herbicide

Get started earlier with Canopy® herbicide

Keep weeds where they belong — out of your soybeans — all the way through canopy closing with a program containing a preemergence application of DuPont™ Canopy® herbicide.

DuPont™ Canopy® herbicide delivers:

- Burndown and residual activity to help maximize early-season control of tough weeds, allowing your postemergence application to be made closer to canopy.
- Two modes of action to help prevent and manage weed resistance, such as glyphosate-tolerant Palmer pigweed and marehail.
- Reliable burndown of winter annuals and early-season weeds, even under cool conditions for a wide application window.

Rate recommendation

**For residual and burndown of weeds <3 inches
and grasses <1 inch tall**

Canopy® 2.25-4.0 oz/A
+ 2,4-D LVE 1 pt/A
+ 1% v/v COC

Application information

- May be applied up to 45 days before planting soybeans.
- See the Ignite label for specific ammonium sulfate and surfactant recommendation.
- As needed, add DuPont™ Synchrony® XP or DuPont™ Classic® herbicide for broadleaves, and DuPont™ Assure® II herbicide for volunteer corn and grasses with the in-crop Ignite application.
- Refer to label for soil pH restrictions in your state.

For more information

Contact your local DuPont crop protection retailer or DuPont representative to learn more about DuPont™ Canopy® for soybeans. And visit us on the Web at canopy.dupont.com.

Weeds controlled or partially controlled preemergence with DuPont™ Canopy®

When used as directed, Canopy® will provide residual control or partial control of the following weeds:

Controlled

Amaranth, spiny
 Beggarweed, Florida
 Cocklebur*
 Hophornbeam, copperleaf
 Jimsonweed
 Ladysthumb
 Lambsquarters
 Morningglory*: annual, ivyleaf,
 entireleaf, pitted, smallflower, tall
 Mustard, wild
 Pigweed: Palmer, redroot, smooth
 Poinsettia (wild)
 Purslane, common
 Ragweed: common, giant*
 Sesbania, hemp
 Sicklepod*
 Sida, prickly (teaweed)
 Smartweed, Pennsylvania
 Spurge, spotted
 Sunflower
 Velvetleaf

Partially controlled

Barnyardgrass
 Burcucumber
 Chickweed, common
 Crabgrass
 Foxtail species
 Johnsongrass (seedling)
 Mexicanweed
 Nutsedge: purple, yellow
 Panicum: fall, Texas
 Signalgrass, broadleaf

* Large-seeded weeds, germinating deep in the soil, such as morningglory, sicklepod, cocklebur and giant ragweed, or other weeds which may emerge at various times during the growing season may require a cultivation or a postemergence herbicide application for season-long control.

Weeds controlled preplant burndown with Canopy®

When used as directed, Canopy® will provide burndown control of the following broadleaf weeds up to 3" in diameter or height and annual grasses up to 1":

Annual grasses
 Bittercress, smallflowered
 Buttercup, smallflower
 Butterweed (cressleaf groundsel)
 Dandelion
 Deadnettle, purple
 Garlic, wild*
 Henbit
 Ladysthumb
 Lambsquarters*
 Lettuce, prickly
 Maretail (horseweed)*
 Mustard, wild
 Pennycress, field

Pepperweed, Virginia
 Pigweed, redroot
 Ragweed: common, giant
 Rocket, yellow
 Shepherd's-purse
 Smartweed, Pennsylvania
 Speedwell, purslane
 Sunflower
 Tansymustard
 Thistle, Canada (aboveground portion)
 Velvetleaf
 Wallflower, bushy
 Whitlowgrass

* Addition of 8 oz ai/A 2,4-D LVE is required for all Canopy® rates.
