

DuPont™ Finesse® Cereal & Fallow

herbicide

DuPont™ Finesse® Cereal & Fallow herbicide delivers:

- Excellent control of labeled winter annual broadleaf weeds.
- Ease of application, since it can be applied with a liquid fertilizer.
- Suppression of annual bluegrass, cheat and downy brome.

Rate and timing recommendations

Finesse® Cereal & Fallow — Wheat

- Preplant = 0.2–0.5 oz/A (winter wheat)
= 0.2–0.4 oz/A (spring wheat)
- Preemergence = 0.2–0.5 oz/A (winter wheat)
= 0.2–0.4 oz/A (spring wheat)
- Postemergence = 0.2–0.4 oz/A (any time after the crop is in the 1-leaf stage, but before boot stage)

Finesse® Cereal & Fallow — Barley

- Do *not* use PRE
- Postemergence = 0.2–0.4 oz/A (begin applications at 2-leaf stage, but before boot stage)

Application information

- Need adequate rainfall after application to activate residual.
- Follow applications of Finesse® Cereal & Fallow with a spring application of DuPont™ Harmony® Extra SG herbicide with TotalSol® soluble granules for wild garlic control.

--	--	--

0.5 ounce per acre (prior to winter wheat emergence only)

Bromus species: (cheat, downy brome, Japanese brome) ^{2,3} Ryegrass, annual ^{2,3}
--

¹ Naturally occurring resistant biotypes of these weeds are known to occur. See **Tank Mixtures, Specific Weed Instructions and Weed Resistance** sections of this label for additional information.

² When used as directed, weeds are suppressed and/or controlled. Weed suppression is a visible reduction in weed competition (reduced population and/or vigor) as compared to an untreated area. Degree of suppression will vary with rate used, size of weeds, and environmental conditions following treatment.

³ See the **Specific Weed Instructions** section on the label for more information about controlling and suppressing these weeds.

Finesse® Cereal & Fallow herbicide is eligible for the DuPont™ Crop Protection Plus® product cost replacement program.*

* See Terms and Conditions for details. Crop Protection Plus® is not available in all states.
