

Shift your corn herbicide program into overdrive preplant to early postemergence

DuPont™
Resolve® Q
herbicide

Preplant through Early POST

DuPont™ Resolve® Q tank mixed with dicamba-containing corn herbicides delivers:

- Additional contact control plus limited residual control of tough grass and broadleaf weeds before or after planting — including ALS-, glyphosate-, HPPD/PPO- and triazine-resistant kochia, pigweed and waterhemp
- Built-in safener technology, represented by the “Q,” that provides corn growers with the flexibility to confidently apply Resolve® Q herbicide even after corn emergence
- Faster, more-consistent burndown than glyphosate alone to get your corn herbicide program off to a strong start
- An additional mode of action to help minimize the occurrence of certain herbicide-tolerant weeds

Application information

- Application may be made preplant, preemergence or postemergence
- The addition of crop oil concentrate or methylated seed oil is recommended for burndown of labeled weeds, depending on the tank mix, rate and conditions
- Adequate soil moisture is required for optimum activity. Rainfall within 5 to 7 days after application will enhance the residual activity of Resolve® Q
- Do not apply as a fallow or preemergence treatment to coarse-textured soils (sand, loamy sand or sandy loam) with less than 1% organic matter

Two-Pass Program	One-Pass Program
<p><u>Preplant/PRE</u> DuPont™ Breakfree® NXT brands, Cinch® brands, Instigate®¹ or Prequel®¹ herbicide (or other preemergent herbicide) <i>Followed by</i> <u>Early POST</u> Resolve® Q¹ 1.25 oz/A + dicamba² + DuPont™ Abundit® Edge herbicide (glyphosate)^{3,4} as needed (for use on glyphosate-tolerant crops only)</p>	<p><u>Early POST</u> Resolve® Q¹ 1.25 oz/A + dicamba² + Abundit® Edge (glyphosate)^{3,4} (For use on glyphosate-tolerant crops only. See label for appropriate rate.) + atrazine as needed</p>
<p>¹ When making applications of Instigate®, Prequel® or Resolve® Q, do not apply more than 1 oz active ingredient rimsulfuron/A during the crop year. ² Use proper rates of the dicamba product based on its label. ³ Refer to the Abundit® Edge (glyphosate) label for specific AMS and surfactant recommendations. ⁴ For use on glyphosate-tolerant corn only.</p>	

DuPont™ Resolve® Q

herbicide

Weeds controlled by DuPont™ Resolve® Q herbicide + dicamba + glyphosate

When used in a tank mixture with DuPont™ Abundit® Edge herbicide (glyphosate), 1.25 ounces of Resolve® Q plus dicamba will add improved burndown and/or residual activity on the following weeds:

Alfalfa, volunteer
 Amaranth, Palmer
 Barley, volunteer
 Barnyardgrass
 Bluegrass, annual
 Buckwheat, wild
 Canola, volunteer
 Chamomile, false
 Chickweed, common
 Cocklebur
 Crabgrass
 Dandelion (6" diameter)
 Filaree, redstem
 Foxtail: bristly, giant, green, yellow
 Henbit
 Johnsongrass, seedling
 Kochia
 Lambsquarters, common
 Marestalk (Horseweed)
 Millet, wild proso
 Morningglory, ivyleaf

Mustard: birdsrape, black, wild
 Nightshade, hairy
 Nutsedge, yellow
 Oat, wild
 Panicum, fall
 Pigweed: prostrate, redroot, smooth
 Powell, spiny
 Purslane, common
 Quackgrass
 Radish, wild
 Ragweed, common
 Ryegrass, Italian
 Sandbur: field, longspine
 Shepherd's-purse
 Signalgrass, broadleaf
 Smartweed, Pennsylvania
 Stinkgrass
 Thistle, Canada
 Velvetleaf
 Waterhemp
 Wheat, volunteer

Atrazine and DuPont™ Breakfree® NXT ATZ, Breakfree® NXT Lite, Cinch® ATZ, Cinch® ATZ Lite and Prequel® are restricted-use pesticides. Some products may not be registered for sale or use in all states. Contact your DuPont retailer or representative for details and availability in your state.
