Squash — Southeastern U.S.

DuPont™ Coragen® insect control is a breakthrough mode of action insecticide that delivers remarkable protection. Optimize yield and quality in your fields by achieving reliable and consistent control of key insect pests in squash.

Key benefits of Coragen®

- Breakthrough mode of action versus current standards helps break the insect resistance cycle
- Excellent control of all major worm pests and leafminer (larvae)¹ plus suppression of silverleaf whitefly nymphs
- The first product with the only active ingredient that controls worms through drip chemigation²
- Long-lasting protection — 14 to 21 days and longer³
- Shortest reentry — 4 hours
- Short preharvest interval — 1 day for squash
- Excellent crop protection — insects stop feeding in minutes
- Application flexibility — drip² or foliar spray (ground and air)
- Works through ingestion or contact to deliver ovicidal⁴ and ovi-larvicidal activity
- Minimal impact on beneficials when applied at labeled rates — excellent fit with IPM programs*
- Does not flare secondary pests or mites
- Rainfast once spray has dried

* In line with Integrated Pest Management and Good Agricultural Practices, insecticide applications should be made when pollinators are not foraging to avoid unnecessary exposure.
¹ Control of *Liriomyza* species except suppression only for *L. huidabrensis* and *L. langei*.
² Drip chemigation is not allowed on all crops. See Coragen® product label for which crops drip chemigation is allowed.
³ Depending on application method, untreated plant material may not be fully protected as a result of plant growth.
⁴ Ovicidal activity on selected pest species.
⁵ Additional labeled crops include artichoke, asparagus, bulb vegetables, bulb garlic, cereal grains, corn (sweet, seed, field, pop), grass forage, fodder and hay, herbs, hops, legume vegetables, peppermint/spearmint, non-grass animal feeds (includes alfalfa), okra, potato, oilseeds, spices, strawberry, sugarcane, tobacco and root and tuber vegetables.

Crops ⁵	Pests (partial list)
	Beet armyworm (<i>Spodoptera exigua</i>)
	Cabbage looper (<i>Trichoplusia ni</i>)
	Corn earworm (<i>Helicoverpa zea</i>)
	Leafminers (larvae) (<i>Liriomyza</i> spp.) ¹
	Silverleaf whitefly nymph suppression
	Beet armyworm (<i>Spodoptera exigua</i>)
	European corn borer (<i>Ostrinia nubilalis</i>)
	Leafminers (larvae) (<i>Liriomyza</i> spp.) ¹
	Loopers
	Tomato fruitworm (<i>Helicoverpa zea</i>)
	Tomato pinworm (<i>Keiferia lycopersicella</i>)
	Western yellowstriped armyworm (<i>Spodoptera praefica</i>)
	Silverleaf whitefly nymph suppression
	Beet armyworm (<i>Spodoptera exigua</i>)
	Cabbage looper (<i>Trichoplusia ni</i>)
	Cross-striped cabbageworm (<i>Evergestis rimosalis</i>)
	Diamondback moth (<i>Plutella xylostella</i>)
	Imported cabbageworm (<i>Pieris rapae</i>)
	Beet armyworm (<i>Spodoptera exigua</i>)
	Cabbage looper (<i>Trichoplusia ni</i>)
	Leafminers (larvae) (<i>Liriomyza</i> spp.) ¹
	Melonworm (<i>Diaphania hyalinata</i>)
	Silverleaf whitefly nymph suppression

Squash — Insecticide Spray Program Southeastern U.S.

Week	Treatment	Insects**
1–3	DuPont™ Vydate® L — 1-2 qt/A via drip chemigation	Nematodes ⁶
3–4	DuPont™ Coragen® — 5 fl oz/A via drip chemigation	Worms, leafminer (larvae), ⁷ silverleaf whitefly nymphs ⁸
	DuPont™ Lannate® SP ¹⁰ — 0.5-1.0 lb/A foliar spray	Worms, melon aphid, cucumber beetle, flea beetle
	Vydate® L — 1-2 qt/A via drip chemigation	Nematodes ⁶
4–6	Coragen® — 5 fl oz/A via drip chemigation 14 days after the first Coragen® application ⁹	Worms, leafminer (larvae), ⁷ silverleaf whitefly nymphs ⁸
	Vydate® L — 1-2 qt/A via drip chemigation	Nematodes ⁶
6–8	DuPont™ Avaunt® — 3.5 oz/A foliar spray <i>or</i> Lannate® SP ⁷ — 0.5-1.0 lb/A foliar spray <i>and/or</i> Vydate® L — 1-2 qt/A via drip chemigation	Worms, including pickleworm, melonworm
		Worms, melon aphid, cucumber beetle, flea beetle
		Nematodes ⁶
8+	Coragen® — 5 fl oz/A foliar spray ⁹ 30 days after previous Coragen® application	Worms, leafminer (larvae), silverleaf whitefly nymphs ⁸

** See individual product labels for specific pests controlled or suppressed by these products.

NOTE: Studies have shown that, when used in a program for pest management, application of Vydate® L can result in enhanced plant vigor.

⁶ For supplemental treatment of specific nematode species following a pre-plant or an at-plant nematicide application. See Vydate® L label for details.

⁷ Control of *Liriomyza* species except suppression only for *L. huidabrensis* and *L. langei*.

⁸ Suppression only.

⁹ See Coragen® product label for specific guidance regarding Insect Resistance Management practices; avoid using the same mode of action on consecutive generations of insect pests.

¹⁰ Lannate® SP is registered for use on summer squash only.
