## DuPont™ Prevathon®

insect control

powered by  
RYNAXYPYR®

### Emergence to pre-tassel April through June

**DuPont™ Prevathon® insect control**  
Broad-spectrum Lepidoptera control with extended residual 14–20 fl oz/A

#### Key benefits of Prevathon®

- Maintains crop quality and improves yield by controlling the toughest ear-feeding pests
- Long-lasting control reduces the number of applications between brown silk and harvest
- Alternative mode of action to manage insect resistance

#### Note on Insect Resistance Management:

The same mode of action insecticide should not be applied to successive generations of target pests. Please consult the Prevathon® product label for additional best practices to support your insect resistance management strategy.

### Pre-tassel through pollination June through July

**Prevathon® 14–20 fl oz/A**

### Pollination to harvest July through October

**Prevathon® 20 fl oz/A**  
**DuPont™ Lannate® LV insecticide 12.0 oz/A**  
for beetle knockdown

DuPont™ Prevathon® may not be registered for sale or use in all states. Contact your local DuPont representative for details and availability in your state.

See individual product labels for specific pests controlled or suppressed by these products. DuPont™ Lannate® LV is a restricted-use pesticide.

This reference guide is not intended as a substitute for the product label for the product(s) referenced herein. Product labels for the above product(s) contain important precautions, directions for use, and product warranty and liability limitations, which must be read before using the product(s). Applicators must be in possession of the product label(s) at the time of application. Always read and follow all label directions and precautions for use when using any pesticide alone or in tank-mix combinations.
