

Realize better yield and storage in onions.

The DuPont Crop Protection onion portfolio provides a better-yielding crop by protecting against disease and insect pests. Effective suppression of pink root provides early crop vigor, while protection against thrips helps reduce instances of disease. By protecting your onions through harvest, you get better crop maturity, which reduces disease vulnerability in the onion and leads to improved quality while in storage.

DuPont™ Fontelis® fungicide

- Effective activity on pink root (suppression)
- Highly active to protect the roots of the plant

DuPont™ Exirel® insect control

- Excellent protection against thrips: rapidly causes feeding cessation
- Fights future population levels with activity against all life stages

For soil applied applications, use DuPont™ Verimark® insect control.

DuPont™ Fontelis®
