**Product Description**

DuPont 5771 is a cadmium free*, screen printable, composition. It is used as a gold wire bondable conductor in high density hybrids. DuPont 5771 is capable of good automatic gold wire bonding yields with 1-mil and 2-mil wire. DuPont 5771 works well over multilayer dielectrics, such as DuPont QM44.

*Cadmium “free” as used herein means that this is not intentionally added to the referenced product. Trace amounts however may be present.

**Processing**

**Substrates**

Properties are based on tests using 96% alumina substrates. Substrates of other compositions and from various manufacturers may result in variations in performance properties.

**Screen Printing Equipment**

A 325 mesh stainless steel screen with an 12 µm (0.5 mil) emulsion thickness is recommended. Printing speeds up to 15 cm/s (6 in/s) can be achieved.

**Drying**

Allow the wet print to level for 10-15 minutes at room temperature. Dry for 15 minutes at 150°C.

**Firing**

Dried prints should be fired in a belt furnace. Use a 30 minute cycle with a peak temperature of 850°C for 10 minutes. No significant changes in performance characteristics were seen after multiple refirings at 850°C. See Figure 1.

**Bonding Conditions**

Hughes 2460-III Automatic Gold Wire Bonder, stage 150°C, ceramic tool, 1.0 mil Au wire, tensile strength 8g min, elongation 3 to 5%. Hughes 2460-III Automatic Gold Wire Bonder, stage 150°C, ceramic tool, 2.0 mil Au wire, tensile strength 40-45g min, elongation 3 to 5%.

Storage and Shelf Life
Containers should be stored, tightly sealed, in a clean, stable environment at room temperature (<25°C). Shelf life of material in unopened containers is six months from date of shipment. Some settling of solids may occur and compositions should be thoroughly mixed prior to use.

Safety and Handling
For Safety and Handling information pertaining to this product, read the Material Safety Data Sheet (MSDS).
