

DuPont™ LuxPrint® 7165

ELECTROLUMINESCENT MATERIALS

Technical Data Sheet

Product Description

DuPont™ LuxPrint® 7165 electroluminescent material is a solvent based, screen-printable ink used for extra protection against moisture when building EL lamps. It offers the advantages of rapid-curing while maintaining adhesion to both electrode compositions and indium tin oxide (ITO). A general recommendation would be to use with electrode composition DuPont 8144.

Storage and Shelf Life

Containers should be stored, tightly sealed, in a clean, stable environment at room temperature (<25°C). Storage in freezers (temperature <0°C) is NOT recommended, as this could cause irreversible changes in the material. Shelf life of material in unopened containers is six months from date of shipment. Some settling of solids may occur and compositions should be thoroughly mixed prior to use.
