**PRODUCT DESCRIPTION**

DuPont™ BQ10 is a UV curable, solventless, screen printable composition used in encapsulant and crossover applications for Bio Sensor applications. It offers the advantages of rapid cure and excellent processing latitude while maintaining excellent electrical and physical properties after cure, including excellent crosshatch adhesion to polyester and polycarbonate substrates and conductors. It is fully compatible with the DuPont Bio sensor conductor compositions.

**PRODUCT BENEFITS**

- Fast UV cure
- Zero VOC when properly cured
- Adhesion to polyester and polycarbonate substrates

**PROCESSING**

**Screen Printing Equipment**

Semiautomatic and manual

**Substrates**

Polyester; polycarbonate

**Ink Residence Time on Screen**

> 2 hours

**Screen Types**

Polyester, stainless steel

**Optimum Cure Conditions for Flexibility**

40 ft/min in air
500 - 1500 mJ/cm*

**Typical Thickness**

(After cure per print)

Printed with 200 mesh stainless steel screen 0.5-0.6 mils

*Two prints of dielectric are strongly recommended to achieve maximum circuit reliability.

---

Table 1 & 2 show anticipated typical physical properties for DuPont™ BQ10 based on specific controlled experiments in our labs and are not intended to represent the product specifications, details of which are available upon request.
STORAGE AND SHELF LIFE
Containers should be stored, tightly sealed, in a clean, stable environment at room temperature (<25°C). Shelf life of material in unopened containers is six months from date of shipment. Some settling of solids may occur and compositions should be thoroughly mixed prior to use.

SAFETY AND HANDLING
For Safety and Handling information pertaining to this product, read the Material Safety Data Sheet (MSDS).
