

2(ee) Recommendation

Use information in accordance with Section 2(ee) of FIFRA

DUPONT™ CORAGEN® INSECT CONTROL

EPA REG. No. 352-729

FOR THE CONTROL OF MINT ROOT BORER IN CALIFORNIA, IDAHO, OREGON, AND WASHINGTON

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Always read this FIFRA 2(ee) bulletin and the entire label on the product container before using this product. For any requirements specific to your State or Tribe; consult the agency responsible for pesticide regulation. Do not apply this product in any way that will contact workers or other persons; either directly or through drift. Only protected handlers may be in the area during application.

In mint growing areas where the mint root borer degree day model is being used and mint is being grown under sprinkler irrigation: apply CORAGEN® at 5.0 fl oz/acre (0.065 lb a.i. per acre) as a foliar spray or via overhead sprinkler chemigation. Application should be timed between 900 and 1250 growing degree days. Foliar sprays must be followed by sprinkler irrigation before swathing. When making a foliar spray, be sure to include an adjuvant to help obtain thorough coverage. Use only adjuvant products that are labeled for agricultural use and follow the directions on the manufacturer's label. Always conduct a premix test for compatibility. Use an adjuvant that does not affect foliage.

For applications after the last cutting of mint, apply CORAGEN® at 3.5 – 5.0 fl oz/acre (0.045 – 0.065 lb a.i. per acre) soon after the last cutting of mint, but before the Mint Root Borer forms an overwintering hibernaculum. Apply via overhead sprinkler chemigation in 2 acre inches of water per acre or as a broadcast spray followed immediately by at least 2 inches of water per acre by overhead irrigation.

For furrow irrigated mint, apply CORAGEN® as a broadcast spray soon after harvest. Follow application with two furrow irrigations in order to move CORAGEN® into the mint root zone before the mint root borer forms a hibernaculum.

DuPont will not be responsible for losses or damages resulting from the use of this product in any manner not specifically instructed by DuPont. User assumes all risks associated with uses not specified by the label or DuPont 2(ee) instructions.

RESTRICTIONS

Make no more than 4 applications per year.

Make one application per cutting.

Do not apply more than 15.4 fl oz CORAGEN® or 0.2 lbs a.i. of chloranthraniliprole containing products per acre per year.

Last application (days to harvest) = 3 days.
