

DuPont™ SentryGlas® Plus

INTERLAYER

Glass laminates made with DuPont™ SentryGlas® Plus Interlayer show excellent visual quality

Because of its high clarity, SentryGlas® Plus lets architects and designers realize their ultimate visions in low-iron safetyglass. DuPont's new interlayer eliminates the disappointing yellow tint that gets added to glass by conventional interlayers. For the first time, designers can specify low iron and safety...and get the full clarity they were looking for.

Clear and Color-predictable

SentryGlas® Plus not only starts clearer than the rest, it also stays clearer. Its Yellowness Index (YI) starts at 1.5 and lower (versus 6 to 12 for conventional interlayers), and SentryGlas® Plus keeps its newborn clarity after years of service.

With SentryGlas® Plus, the clarity is permanent; it won't turn yellow over time. Not only does the interlayer remain clear, there are also no adhesives, other laminating aids or additives to worry about inside the composite.

The miracles of science™

Worldwide DuPont Sales and Support

DuPont Glass Laminating Solutions supplies and supports customers from research, manufacturing and sales locations worldwide.
