**1** **BETAWIPE™, BETACLEAN™, BETAPRIME™** and **BETASEAL™** direct glazing solutions for structural and stationary glass bonding that meet globally mandated requirements.

**2** **BETAFORCE™** and **BETAMATE™** structural and semi-structural adhesives that combine various materials including coated sheet steel, glass-reinforced-plastics, PU, PVC, ABS, PC, and plywood used for roofs, floors, body/side panels, luggage compartments and other component bonding.

**3** **BETAFFILL™** solvent- and isocyanate-free sealer systems combined with excellent UV stability for seam sealing, gap filling, and underbody coating when using bare aluminum, painted and stainless steel and plywood.
