FILMTEC™ FORTILIFE™ RO Elements:

Tackle the most challenging waters and applications, with reliable performance and expert support from DuPont. FILMTEC™ FORTILIFE™ RO Elements can help you:

- Reduce water costs
- Achieve sustainability goals
- Minimize biofouling problems
- Move toward Minimal Liquid Discharge (MLD)
A family of options to help meet your challenges.

**FILMTEC™ FORTILIFE™ XC-N Element**
Reduce costly waste by converting a large fraction of RO concentrate into pure, easier-to-crystalize salt solutions.

**FILMTEC™ FORTILIFE™ XC70 Element**
Maximize purity of reuse water while concentrating the brine to > 70,000 ppm Total Dissolved Solids (TDS), within standard operating limits.

**FILMTEC™ FORTILIFE™ XC80 Element**
Lower brine volume and maximize recovery by concentrating the brine to > 80,000 ppm TDS, within standard operating limits.

**FILMTEC™ FORTILIFE™ CR100 Element**
Reduce shutdowns, chemical use, cleanings by up to 50%, and energy costs by as much as 10% in operations where biofouling is a problem.
