

Peter Ohlendorf, Ph.D.

Technical Service and Development
Specialist
MOLYKOTE® Specialty Lubricants

Primary Responsibilities

- Technical service for customers and distributors of MOLYKOTE® Specialty Lubricants in Europe, the Middle East and Africa (EMEA)
- Development of new anti-friction coatings
- Application development for MOLYKOTE® Specialty Lubricants

Experience and Expertise

At the University of Bayreuth, Peter specialized in functionalization of metal nanoparticles with liquid crystalline polymers. Following graduation in 2015 with a Ph.D. in chemistry, he began post-doctoral work at Cornell University, where he further strengthened his knowledge of polymer chemistry and gained experience as a project leader through an industrial cooperation.

In 2017, Peter joined The Dow Chemical Company in Germany, where he worked as a technical service and development specialist for MOLYKOTE® Anti-Friction Coatings.

In April 2019, Dow's MOLYKOTE® Specialty Lubricants business transitioned to DuPont. In his current role as technical service and development specialist at DuPont, Peter serves key EMEA distributors and direct customers, providing technical support – primarily for automotive applications – for MOLYKOTE® Specialty Lubricants. He develops new anti-friction coatings and supports product reformulations required by raw material discontinuations or new regulatory guidelines. Peter also develops new applications for MOLYKOTE® *Smart Lubrication™* solutions.

Education

Ph.D., Chemistry, University of Bayreuth (Germany)

External Representation

Member of the German Chemical Society (GDCh)

About MOLYKOTE® Specialty Lubricants

For more than 70 years, customers around the world have trusted the MOLYKOTE® brand for performance and expertise to solve or prevent virtually any lubrication problem and to save energy. Available through a global network of channel partners, MOLYKOTE® brand lubricants – which include anti-friction coatings, compounds, dispersions, greases, oils and fluids, and pastes – serve the automotive market and industrial/maintenance, repair and overhaul (MRO) markets.
