

DuPont™ Liveo™ Silicone Resin Blend technology

Offering formulation flexibility and diverse film-forming properties for topical applications

Safety, efficiency and substantivity benefits are key to formulating over-the-counter or pharmaceutical topical skin products that increase consumer satisfaction. Topical skin medications containing the right topical ingredients can make the difference in patient comfort and compliance while offering a long-lasting film barrier on the skin.

Liveo™ Silicone Resin Blend technology provides various film-forming and long-lasting benefits in formulations. It is designed to provide formulation flexibility with a wide range of materials offering diverse film-forming properties for a chosen application.

Liveo™ Silicone Resin Blend technology

This technology is a blend of silicone resin solubilized in a range of carrier solvents – volatile or non-volatile/silicone or organic.

A range of potential benefits and properties

By selecting the appropriate resin blend in terms of solid content and carrier solvent, desired specific benefits and properties can be achieved, including:

- Medium to long-lasting film
- Permeable to semi-permeable film
- Range of film flexibility and durability
- Drying time tunability
- Wash-off resistance
- Ability to deliver actives/drugs

Applications

Liveo™ Silicone Resin Blend technology can be incorporated easily into many product forms:

- Creams for skin barrier applications
- Sprays that offer ease of application and protect the skin
- Gels for novel forms in challenging skin conditions

Target indications

- **Ostomy care:** Skin barrier and protective film
- **Wound care:** Scar management, liquid bandages, skin barrier
- **Skin care:** UV protection, sunscreen
- **Dermal care:** Drug delivery therapy for acne, actinic keratosis, antifungal, pain management, etc.

DuPont™ Liveo™ Silicone Resin Blend offering⁽¹⁾

Product	Chemical description	Carrier	Main benefits
Liveo™ TE-9720 Resin Blend ⁽¹⁾	Dimethicone and Trimethylsiloxysilicate	Dimethicone 100 cSt	<ul style="list-style-type: none"> Film-forming behavior Long-lasting film Wash-off resistance Non-occlusive/breathable material
Liveo™ TE-9721 Resin Blend ⁽¹⁾	Caprylyl Methicone and Trimethylsiloxysilicate	Caprylyl Methicone	<ul style="list-style-type: none"> Film-forming behavior Long-lasting film Wash-off resistance Non-occlusive/breathable material Good compatibility with various excipients

⁽¹⁾New development with low cyclosiloxane content. Has been designed to meet the substance of very high concern (SVHC) threshold for concerned cyclosiloxanes (below 0.1%) proposed by REACH regulation (EC) No 1907/2006.

Proposed Liveo™ Silicone Resin Blend technology toolbox⁽²⁾

About DuPont™ Liveo™ Healthcare Solutions

DuPont™ Liveo™ is a globally recognized leader in technology for a broad range of innovations in medical devices, biopharmaceutical processing and pharmaceutical solutions. DuPont high-performance materials help create safer healthcare environments and protect the health of patients and healthcare providers worldwide. We help enable smarter healthcare and positive patient outcomes.
