

Tedlar®

Flight Control System Lab Lobby Installation

Tedlar™ wallcovering was installed in the Flight Control System (FCS) complex that is a part of the Aeronautical Development Establishment (ADE) in Bengaluru, India. As a laboratory of the DRDO (Defense R&D Organization), the complex helps develop avionics for combat aircraft.

The six story building was constructed in a record 45 days. The wallcovering was installed in the final few days, helping achieve this impressive feat. Wallcovering with Tedlar™ was chosen for its durability, stain-free appearance, and lasting protection.

Tedlar™ wallcovering is ideally suited for high-traffic areas such as lobbies due to its unparalleled performance in even the most rigorous locations. Tedlar® film can stand up to the harshest industrial cleaning products, including bleach and alcohol-based solvents. This makes it easy to wipe away just about everything – keeping walls looking brand new for years.

Highlights

Surface Area:

4000 sq. ft. of wallcovering

Year of Installation:

2022

Location:

India

Partners:

Odd Jobs India
