**NOTES:**

- For additional information regarding product installation and/or fabrication instructions for recessed window corners, refer to the applicable DUPONT® Self-Adhered Flashing Systems products installation guidelines.

- Installation is applicable for buildings less than 4 stories and low-rise multi-family residential buildings less than 6 stories when performance requirements do not exceed ASTM E1677. (65 MPH)

- Buildings less than 5 stories and low-rise multi-family residential products installation guideline.

- Recesed Greater than 4”

- Integral Flanged Window

- Before WRB Installation Sequence - Method 1
Recessed Window Corners

A. Cut a piece of Dupont™ FlashWrap™ NF at least 3" longer than the length of the recess to be installed. Adhere the release paper onto the NF starting at the bottom corner of the recess, and extend a minimum of 2" onto sides of recess. Fasten at the top of the recess, and extend a minimum of 2" onto sides of recess.

B. Cut a piece of Dupont™ FlashWrap™ NF at least 3" longer than the length of the recess to be installed. Adhere the release paper onto the NF starting at the bottom corner of the recess, and extend a minimum of 2" onto sides of recess. Fasten at the top of the recess, and extend a minimum of 2" onto sides of recess.

C. Place a piece of Dupont™ FlashWrap™ NF at least 3" longer than the length of the recess to be installed. Adhere the release paper onto the NF starting at the bottom corner of the recess, and extend a minimum of 2" onto sides of recess. Fasten at the top of the recess, and extend a minimum of 2" onto sides of recess.

D. Fold the release paper from the corner around the recess flange, and extend a minimum of 2" onto sides of recess. Fasten at the top of the recess, and extend a minimum of 2" onto sides of recess.

E. Extending the top corner of recess, adhert to the recess edges, and extend a minimum of 2" onto sides of recess.

F. Apply Dupont™ flash sealant or recommended sealant on the face of the recess, to the jamb, and extend a minimum of 2" onto sides of recess. Fasten at the top of the recess, and extend a minimum of 2" onto sides of recess.

G. Apply Dupont™ FlashWrap™ NF at least 3" longer than the length of the recess to be installed. Adhere the release paper onto the NF starting at the bottom corner of the recess, and extend a minimum of 2" onto sides of recess. Fasten at the top of the recess, and extend a minimum of 2" onto sides of recess.

H. Remove the release paper from the corner around the recess flange, and extend a minimum of 2" onto sides of recess. Fasten at the top of the recess, and extend a minimum of 2" onto sides of recess.

I. Apply Dupont™ FlashWrap™ NF at least 3" longer than the length of the recess to be installed. Adhere the release paper onto the NF starting at the bottom corner of the recess, and extend a minimum of 2" onto sides of recess. Fasten at the top of the recess, and extend a minimum of 2" onto sides of recess.

J. Repeat steps through for opposite jamb.

NOTES:

- For additional information regarding product installation and/or fabrication instructions for recessed window corners, refer to the applicable Dupont™ self-adhered flashing systems products installation guidelines.

- Installation is applicable for buildings less than 2 stories and low rise multi-family residential buildings less than 3 stories when performance requirements do not exceed ASTM E1677 (65 MPH equivalent structural load and 15 MPH equivalent wind-driven rainwater infiltration), and window/door design ratings that do not exceed DP45.

- Equivalent structural load and 15 MPH equivalent wind-driven rainwater infiltration, and buildings less than 6 stories when performance requirements do not exceed ASTM E1677 (65 MPH equivalent structural load and 15 MPH equivalent wind-driven rainwater infiltration), and window/door design ratings that do not exceed DP45.
STEP 19
A. INSTALL DUPONT™ RESIDENTIAL SEALANT OR RECOMMENDED SEALANT (AND BACKER ROD AS NECESSARY) AROUND THE WINDOW OPENING AT THE INTERIOR. IT IS ALSO ACCEPTABLE TO USE DUPONT™ WINDOW & DOOR FOAM OR RECOMMENDED FOAM AT THE INTERIOR CAVITY OF THE JAMBS AND HEAD. IF FOAM IS USED AT THE SILL, RECOMMENDED SEALANT SHOULD BE USED AT THE SILL AREA BEHIND THE FOAM TO ENSURE A PROPER WATER SEAL.

STEP 20
A. CUTOFF DUPONT™ FLUXWRAP™ NF AT LEAST 12" LONGER THAN WIDTH OF RECESS ROUGH OPENING.

STEP 21
A. CUTOFF DUPONT™ FLUXWRAP™ AT LEAST 12" LONGER THAN WIDTH OF RECESS ROUGH OPENING.

STEP 22
A. INSTALL THE DUPONT™ TYVEK® WRB ACROSS THE ROUGH OPENING ALONG THE JAMBS AND HEAD AND BEHIND THE SEALANT.

STEP 23
A. CUT DUPONT™ FLEXWRAP™ NF AT LEAST 12" LONGER THAN WIDTH OF RECESS ROUGH OPENING.

STEP 24
A. CREATE 6" HORIZONTAL SLITS IN THE DUPONT™ TYVEK® WRB AT EACH LOWER CORNER OF THE PERIMETER CUT.

STEP 25
A. TAPE SEAMS AT BOTTOM, SIDES AND TOP OF ROUGH OPENING USING DUPONT™ TYVEK® TAPE.

STEP 26
A. TAPE SEAMS AT BOTTOM, SIDES AND TOP OF ROUGH OPENING USING DUPONT™ TYVEK® TAPE.

STEP 27
A. TAPE SEAMS AT BOTTOM, SIDES AND TOP OF ROUGH OPENING USING DUPONT™ TYVEK® TAPE.
