

# In step with the future of construction

DuPont™ Styrofoam™ Brand ST-100 XPS Insulation has gone Beyond Blue with our low-GWP formulations. This launch represents the end of a journey that was driven by our commitment to build a more sustainable future, all while maintaining the trusted performance you've come to expect.

**1941**

Styrofoam™ is invented, creating an entirely new product category (XPS)

**2009**

Styrofoam™ Brand Insulation introduces zero ODP (ozone depletion potential) formulation

**2016**

Styrofoam™ Brand Insulation begins production with 100% renewable energy

**2021**

Styrofoam™ Brand ST-100 Series XPS low-GWP formulation launched in HFC-regulated U.S. states

**2021**

Published Embodied Carbon/LCA Optimization Assessment, conducted by WAP Sustainability Consulting. Low-GWP Styrofoam™ Brand XPS achieves **94% reduction in Embodied Carbon**, providing customers with 200 percent cost, or equivalent to two products, for the LEED v4.1 LCA Optimization credit.

**2023**

R&D 100 Award for Styrofoam™ Brand Plazamate™ XR Foam Insulation – offering the highest thermal resistance per inch of any extruded polystyrene (XPS) roofing insulation

**1983**

Styrofoam™ Brand Insulation begins a proud legacy of support with Habitat for Humanity

**2011**

BLUEDGE™ technology is introduced, providing a more sustainable flame-retardant solution for polystyrene foam

**2021**

Styrofoam™ Brand XPS reduced-GWP formulation launched in Canada

**2021**

Environmental Product Declaration (EPD) published for low-GWP Styrofoam™ XPS providing easy access to embodied carbon data

**2023**

ACC Sustainability Leadership Award in the Environmental Protection category

**November 2023**

**Conversion Complete:**

Styrofoam™ Brand Series XPS low-GWP formulation launched nationwide
