

THE DUPONT
BUILDING KNOWLEDGE CENTER

DuPont Building Knowledge Center Quality Assurance Program

Mitigate costly construction issues before they happen

Across the
commercial construction industry,
installation issues account for
69% of errors
resulting in rework.

Construction services from DuPont make the difference

DuPont's game-changing **Quality Assurance Program** can help prevent costly project rework and construction delays through expanded design review services and field support. This is a single-source solution to help ensure proper installation and longevity for your building envelope.

Design review services include*:

- Custom Building Envelope Detail Review
- DuPont Installation Literature Conformance Review
- Continuous WRB/AB Drawing Review
- ICC IECC/ASHRAE 90.1 Prescriptive Opaque Wall R-value Compliance Evaluation
- Vapor Barrier Code Compliance
- NFPA 285 Wall Compliance Check
- Hourly Rated Wall Conformance Review
- Dew Point Analysis

*Packages are customized based on specific needs.

Purchasers of this package are eligible for **an exclusive 15-Year Product and Labor Limited Warranty** for the following products:

- **DuPont™ Tyvek® CommercialWrap®** and **Tyvek® CommercialWrap® D**
- **DuPont Self-Adhered Flashing Products**, including DuPont™ Flashing Tape, StraightFlash™, VersaFlange™ (formerly StraightFlash™ VF), FlexWrap™ EZ and FlexWrap™

4 ways the Quality Assurance Program can help minimize construction delays and rework

- 1 **Details.** Getting the details right affects every stage of the construction process. A review of related construction details – especially those that are repeated many times on a project – can help ensure that they conform to the applicable DuPont Installation Guidelines.
- 2 **Training.** For novice installers, demonstration of proper installation techniques is critical. Hands-on training, especially around addressing complex and high-risk conditions, can be scheduled with one of our more than 160 highly trained field representatives.
- 3 **Preconstruction meetings.** Installation quality can be improved when critical or complex details identified during the design review process are first practiced on a mock wall. DuPont Building Envelope Specialists can attend preconstruction and mock wall meetings to help ensure these conditions are properly addressed before construction begins.
- 4 **Expert observations.** DuPont Building Envelope Specialists can provide routine field observations during the construction phase to help address any questions or concerns and ensure compliance with DuPont Installation Guideline requirements.

Learn more

With protection for all six sides, DuPont is your single source for complete building envelope protection. Request a quote today for a custom review for added confidence during and after your build.
