The DuPont™ Thermax™ Wall System at a Glance

Our system eliminates the need for batt insulation, exterior gypsum and air and water resistive barriers to easily achieve the highest standards in energy efficiency.

**What is the DuPont™ Thermax™ Wall System?**
The DuPont™ Thermax™ Wall System is a patented system from DuPont that offers architects and design professionals efficiency at every level by integrating thermal, air, and water barriers into one system. It meets all applicable IBC and ASHRAE requirements using industry-proven products for greater results – helping to make their commercial construction business even more profitable.

**Key benefits of the DuPont™ Thermax™ Wall System:**
**Exterior insulation:**
- *Saves time and money* – simplifies the construction process for faster installation.
- *Best warranties in the industry* – 15-year thermal and water-resistant warranties and a 6-month exposure warranty.
- *High performance* – provides sustainable long-term thermal protection – which adds up to multiple LEED credits.

**Exterior insulation products that fit within the system:**

**DuPont™ Thermax™ XARMOR™ (ci) Exterior Insulation**
The only DuPont™ Thermax™ insulation with a unique dark exterior facer optimized to go behind rain screen exteriors and strong enough to stand up to tough job site conditions. It’s the most efficient way to achieve continuous insulation.

**DuPont™ Thermax™ (ci) Exterior Insulation**
Our mid-range foil facer offers mid-range durability for an insulation that continues to outperform — provided at a lower price point to give builders more flexibility.

**DuPont™ Thermax™ Sheathing**
A rigid foam insulation that effectively reduces condensation for exceptional moisture protection.

Trust DuPont™ Thermax™ Insulation from the inside, out.

DuPont also offers a full line of interior DuPont™ Thermax™ insulation products that offer high efficiency and fit any size building or budget.

**Key benefits**

- **Increased durability** – a differentiated, reinforced core allowing flexibility without breakage in the rigid board.
- **The most fire-resistant polyisocyanurate insulation** – UL Ratings, FM 4880, Class A, and many NFPA 285 compliant assemblies.
- **Free-rise technology** – provides a homogenous core that reduces warm holes, weak points and potential water, air, or fire paths – providing a better R-value and increased dimensional stability.

### Interior Products:

- **DuPont™ Thermax™ Heavy Duty**
  - The most durable finish choice can be pressure washed up to 2,000 psi.
- **DuPont™ Thermax™ Light Duty**
  - A mid-grade facer strength that can be pressure washed up to 1,000 psi.
- **DuPont™ Thermax™ White Finish**
  - With a white-embossed surface, this mid-grade facer is aesthetically pleasing.
- **DuPont™ Thermax™ Metal Building Board**
  - Ideal for metal building owners and contractors, but can be used anywhere a washable interior surface is needed.
