REDUCING THE RISKS WITH DUPONT CHEMICAL PROTECTIVE CLOTHING

DUPONT DEVELOPED CHEMICAL PROTECTIVE CLOTHING TO HELP SAFEGUARD MEN AND WOMEN FROM CHEMICAL HAZARDS THAT CAN AND CAN'T BE SEEN, SUCH AS DANGEROUS VAPORS, LIQUIDS, AND PARTICLES.

DuPont™ Tyvek® Chemical Protective Clothing

Whether the job is performing asbestos abatement, applying insulation, or handling industrial chemicals, DuPont understands the risks. That's why we've developed chemical protective clothing engineered from Tyvek® and Tychem®. Protection is built into the fabric itself; there are no films or laminates to abrade or wear away. They are made to help reduce workers from chemical exposure while performing their jobs. And for a better fit, Tyvek® and Tychem® garments with comfort fit design have been engineered for enhanced worker range of motion and durability in use.
