

Tyvek.

DUPONT™ TYVEK® 800 J **YOU'RE COMFORTABLY PROTECTED.**

Providing a suitable protective barrier against many low-concentration, water-based, inorganic chemicals and particles, down to one micron in size, our new Tyvek® 800 J coverall offers an optimum fit with full freedom of movement. Developed to our highest standards, it is soft, comfortable and lightweight without compromising durability. In a Tyvek® 800 J, you're comfortably protected.

DUPONT™ TYVEK® 800 J YOU'RE COMFORTABLY PROTECTED.

The new liquid-tight garment from DuPont that is both comfortable and robust

Tyvek® 800 J is a new limited-use Type 3* chemical protective garment from DuPont that combines resistance to pressurized jets of low-concentration, water-based, inorganic chemicals with protection, durability and freedom of movement thanks to its innovative "Tyvek® 800 J Fabric Technology."

It has been designed for work in applications requiring chemical, liquid and/or oil protection.

Typical examples include:

- Industrial cleaning
- Petrochemical installations
- Sewers
- Maintenance

Comprehensive protection against a range of hazards

The Tyvek® 800 J garment provides:

- An effective barrier against many low-concentration, water-based, inorganic chemicals (even under pressure), greater than one micron hazardous particles, as well as oil repellency (Category III, Type 3)

- Bright over-taped seams
- Protection against biological hazards (according to EN 14126)
- Protection against radioactive contamination (EN 1073-2) up to Class 2**
- Protection against electrostatic discharge (antistatic according to EN 1149-5)

Tyvek® 800 J – durable and comfortable protection

- New Tyvek® 800 J garments are based on the durable barrier performance of Tyvek®
- Its fabric is lightweight and soft, as well as permeable to water vapor

An ergonomic design that adapts to wearer's movements

As with all DuPont garments, achieving an ergonomic fit consistent with the shape and movements of the user was at the core of the development of new Tyvek® 800 J. Hood, sleeve, waist and leg design was optimized to deliver a close, protective fit when moving, yet remains uninhibited due to the flexibility and lightness of the fabric itself. Design features of the garment include:

- A chin flap for increased liquid protection and a closer fit when wearing full face masks
- Thumb loops to prevent the sleeves from riding up
- Elastic wrists, ankles and waist
- Distinct orange taping of the garment seams providing color contrast
