

# DuPont™ Tychem® 2000

## Lightweight and durable protection against chemical threats

- Composed of Tyvek® fabric with a polyethylene coating
- Provides at least 30 minutes of protection against >40 chemical challenges
- Suitable for light splash protection for a variety of industrial environments
- Provides protection in pandemic preparedness activities when paired with other appropriate personal protective equipment (PPE) including masks, gloves and eye protection
- Tychem® 2000 fabrics with taped seams have been tested and have passed the requirements of ASTM Standards F1670 and ASTM F1671, the recognized blood and viral penetration test methods in North America
- Available in a variety of garment styles

Please visit our free online DuPont™ SafeSPEC™ selector tool to help you determine appropriate protection based on your hazard risk assessment and to view our additional design offerings.

| Part number      | Garment style                                                  | Seam construction | Color  | Sizes              |
|------------------|----------------------------------------------------------------|-------------------|--------|--------------------|
| QC120SYLXX001200 | Coverall                                                       | Serged            | Yellow | MD-7X              |
| QC120BYLXX001200 | Coverall                                                       | Bound             | Yellow | MD-6X              |
| QC122SYLXX001200 | Hooded coverall with attached socks                            | Serged            | Yellow | MD-8X              |
| QC122BYLXX001200 | Hooded coverall with attached socks                            | Bound             | Yellow | MD-6X              |
| QC122BYLXX0012BN | Berry Amendment compliant hooded coverall with attached socks  | Bound             | Yellow | MD-6X              |
| QC122TYLXX000400 | Hooded coverall with attached socks                            | Taped             | Yellow | MD-6X              |
| QC125SYLXX001200 | Coverall with elastic wrists and ankles                        | Serged            | Yellow | MD-7X              |
| QC125BYLXX001200 | Coverall with elastic wrists and ankles                        | Bound             | Yellow | MD-6X              |
| QC125TYLXX000400 | Coverall with elastic wrists and ankles                        | Taped             | Yellow | MD-5X              |
| QC127SYLXX001200 | Hooded coverall with elastic wrists and ankles                 | Serged            | Yellow | MD-7X              |
| QC127SYLXX0012NF | NAFTA compliant hooded coverall with elastic wrists and ankles | Serged            | Yellow | MD-4X              |
| QC127BYLXX001200 | Hooded coverall with elastic wrists and ankles                 | Bound             | Yellow | MD-6X              |
| QC127TYLXX000400 | Hooded coverall with elastic wrists and ankles                 | Taped             | Yellow | MD-6X              |
| QC273BYLXX010000 | Bib-style apron                                                | Bound             | Yellow | One size fits most |
| QC275BYLXX002500 | Long-sleeved apron                                             | Bound             | Yellow | SM-4X              |
| QC275BYLXX0025HL | Long-sleeved apron with hook-and-loop neck closure             | Bound             | Yellow | SM-4X              |
| QC275TYLXX0025HL | Long-sleeved apron with hook-and-loop neck closure             | Taped             | Yellow | SM-5X              |
| QC278BYLXX001200 | Long-sleeved apron                                             | Bound             | Yellow | One size fits most |
| QC500BYLXX020000 | Sleeve                                                         | Bound             | Yellow | One size fits most |

## Seam construction

Seams are a critical component of the overall barrier protection provided by a chemical protective garment. It is vital to select the appropriate seam configuration for your application needs and to know that the garment will be constructed with strong, tight seams. One loose thread or gap and the barrier between you and your environment unravels—leaving you vulnerable.

### Serged or sewn\*

A seam produced when three threads are interlocked around the raw edges of two pieces of material for a strong, stress-resistant seam.

### Bound\*

Tightly sewn with a reinforced outer binding to increase seam strength and barrier. For potential misting exposure of non-hazardous liquids or particle penetration through the seam.

### Taped

Both sewn and taped to provide strong chemical resistance against heavy liquid splashes and tough seam stress. A sewn seam is covered with a strip of compatible material by heat-sealing.

\*Serged and/or bound seams are degraded by some hazardous liquid chemicals, such as strong acids, and should not be worn when these chemicals are present.

### DuPont™ SafeSPEC™—we're here to help

Our powerful web-based tool can assist you with finding the appropriate DuPont garments for chemical, controlled environment, thermal and mechanical hazards.
