

# DuPont™ Tychem® 2000 SFR

## Chemical and secondary flame protection in a lightweight garment

**In many work places, dual chemical and fire hazards are serious concerns. Don't compromise on protection.**

- Provides an effective barrier against a range of inorganic acids and bases as well as industrial cleaning chemicals and particles.
- Provides secondary flame resistance when worn over primary flame-resistant garments like those made with DuPont™ Nomex®.
- In the event that a flash fire occurs, the garment won't contribute additional burn injury if appropriate primary flame-resistant personal protective equipment is worn beneath.

Please visit our free online DuPont™ SafeSPEC™ selector tool to help determine the appropriate protection based on your hazard risk assessment.

Part number	Garment style	Seam construction	Color	Sizes
QS127TGRXX000400	Respirator-fit hooded coverall with elastic wrists and ankles	Taped	Green	SM-7X
QS128TGRXX000400	Respirator-fit hooded coverall with elastic wrists, attached socks, and outer boot flaps	Taped	Green	SM-5X
QS275TGRXX001200	Sleeved apron	Taped	Green	SM-5X
QS750TGRXX000400	Bib overall & jacket combo	Taped	Green	SM-4X

### SafeSPEC™—we're here to help

Our powerful web-based tool can assist you with finding the appropriate DuPont garments for chemical and controlled environment hazards.

### Certified Industrial Hygienist team

A DuPont Certified Industrial Hygienist can conduct a job hazard assessment to help you determine the best DuPont garment for a specific hazard.

NOTE: Tychem® 2000 SFR garments provide only secondary flame-resistant protection. They must always be worn over appropriate primary flame-resistant protective clothing in an environment that needs flame protection, along with other personal protective equipment that protects your face, hands and feet. For Tychem® 2000 SFR hooded garments, a primary flame-resistant hood/balaclava should be worn.

This information is based upon technical data that DuPont believes to be reliable. It is subject to revision as additional knowledge and experience become available. It is the user's responsibility to determine the level of toxicity and the proper personal protective equipment needed. The information set forth herein reflects laboratory performance of fabrics, not complete garments, under controlled conditions. This information is intended for use by persons having the technical expertise to undertake evaluation under their own specific end-use conditions, at their own discretion and risk. Anyone intending to use this information should first check that the garment selected is suitable for the intended use. The end-user should discontinue use of garment if fabric becomes torn, worn or punctured, to avoid potential chemical exposure.
