

Marisol Rodriguez
Tedlar® R&D Leader
DuPont Photovoltaic and Advanced Materials

Dr. Marisol Rodriguez is a Technical Manager in the DuPont Photovoltaic and Advanced Materials business. She leads the Tedlar® Research & Development organization working on new product development, application development and technical service for the photovoltaic, aircraft and industrial market segments. Her role includes strategic technology direction and planning, execution of development and commercialization projects for new and improved products and strengthening and renewing the global technical organization.

Marisol earned a bachelor's degree in chemistry at the University of Puerto Rico in Rio Piedras, Puerto Rico and a PhD in analytical chemistry at the University of Texas, Austin.
