

Rob Cockerill
Global Product Portfolio Leader
DuPont Photovoltaic & Advanced Materials

Rob currently serves as the Global Product Portfolio Leader responsible for the commercialization of new and innovative products to drive growth by fulfilling unmet market and customer needs. He manages the health and financial performance of the existing diverse product portfolio and ensures excellence in the Product Stewardship and Sustainability of the portfolio for the PVAM business and customers. He leads a group of regional leaders that execute plans to help customers maximize the value and societal impact of solar technology through product performance and longest life performance in the field in an ever-changing marketplace.

He also supports customers in other key segments such as Automotive, Aerospace, Military and Consumer Electronics.

Rob has been with DuPont since 1992 and has held multiple leadership roles including: Sales and Technical Service Manager for the United States and Europe, Global Advanced Materials Marketing Manager for PVAM and Global Strategic Planning Manager for DuPont Electronics and Communications. He served as the M&A and Integration leader for the acquisition of Innovalight and later held the roles of Business Manager for Innovalight, Sunnyvale Site Leader and DuPont Corporate Account Manager for a leading global Electronics OEM in Silicon Valley. Rob has held multiple Operations and Site leadership roles in support of the DuPont Nylon Business as well as DuPont Electronics and Communications.

All of these roles have allowed Rob to provide leadership and strategy to the PVAM and MCM global businesses within DuPont. He has coordinated efforts with top consumer electronic OEMs across multiple business units and leveraged technology to help customers innovate and accelerate DuPont's sales in diverse, global industries. Rob is certified as a Black Belt and Six Sigma Champion. He holds a B.S. degree in Chemical Engineering from The University of Texas at Austin.
