Design meets dependability with the new line of DuPont™ Tedlar™ wallcoverings that offer an extensive palette for a wide variety of spaces including office and commercial setups, hospitality spaces, healthcare and wellness facilities and residential projects. With availability in Type II wallcovering with Type III characteristics, Tedlar™ wallcoverings are easy to clean and provide scratch and stain resistance, all with the modern, fashion-forward aesthetics that designers look for. The wallcoverings are long-lasting and protective against wear and tear that site owners even save on repainting and maintenance costs, making them a sustainable choice and an ideal surfacing solution for high-traffic spaces.

The design-forward collections are distinguished in their league backed by the proven performance of DuPont™ Tedlar® PVF film used in various applications in aerospace, transportation, healthcare, and construction for several decades. Especially for segments where wellness and health are a priority, Tedlar™ wallcoverings become a natural choice. More patterns, colours and

textures are added every season allowing designers and architects the freedom to create modern, on-trend spaces and cater to unique design needs.

Here's what makes DuPont™ Tedlar™ wallcoverings a stellar choice for design professionals:

Durable, resilient and stain proof

Tedlar™ wallcoverings offer unrivalled durability when hygiene and newness of interiors matter the most, be it restaurants, conference and meeting spaces or healthcare projects. Designers and architects appreciate the brand for its extreme focus on quality and resilience. The brand shines for its attention to detail and delivers an unparalleled surface protection performance in even the most rigorous environments.

With resistance to scuffs, stains, and harsh cleaning chemicals or disinfectants, the long-lasting durability of Tedlar™ Wallcoverings keep designs as fresh as the day they were installed. Building a reputation for stain resistance, the wall covers stand strong against the harshest industrial cleaning products, including bleach and alcohol-based solvents and strong acids without discolouration.

Tedlar™ wallcoverings are protected by a film that provides an impervious barrier against stains, making it easy to wipe away everything from permanent marker to iodine without compromising on the decorative demands of the space.

Certified by the experts

Tedlar™ wallcoverings have received Greenguard Gold Certification and Greenguard Mold and Mildew Verification, as well as a Health Product Declaration (HPD) approval from HPD Collaborative. The product contributes to healthier indoor air in offices, medical facilities and schools, in addition to being mold resistant. This works to the advantage of architects and designers who can earn LEED points and keep their customers happy too. The products have stood the test of time for more than 30 years, so designers can put their trust in DuPont and ensure flawless interiors for years to come.

Stylish and versatile

Whichever space they grace, Tedlar™ wallcoverings leave a lasting impression. The collections are designed to give every space a touch of elegance and personality, to suit individual design requirements.

The Avant-Garde Collection of wallpapers is inspired by architectural elements like wood, metal and stone, that debuts five new patterns with a

design-forward appeal. The Passport Collection is inspired from places and styles around the world, from the natural patterns of the ‘New England Willow’ to the strong textures of ‘Dakota Grasscloth’ and the subtle weaves of ‘Catalina Linen’. The Celestial Collection evokes a contemporary spin on the cosmos. Patterns in the collection give the feeling of wonder and enlightenment while the Geometrico Collection creates swanky geometric patterns in modern colours that pair with textured linen patterns.

With Tedlar™ wallcoverings, one thing is certain: you’re spoilt for choice! To know more about DuPont™ Tedlar™ wallcoverings, visit the [website](#).
