

BETAPRIME™ 5504G All-in-One Primer

“No Shake” means one less worry, whether your installation is mobile or in the shop

- Optimizes installation process – elimination of shaking step makes process easier, safer, faster
- Fast flash-off (dry) time helps eliminates excessive waiting time following application
- One primer for all common aftermarket substrates: glass, nicks and scratches, paint, encapsulations (PUR, PVC, PAAS and metal) and cut bead
- Reduces cost and optimizes inventory by eliminating redundant products
- Effective in treating larger bare metal areas – allows for corrosion treatment in the field
- Works in a wide range of weather and temperatures from -5°C to 40°C
- Ideal for mobile installations

BETAPRIME™ 5504G – “No-Shake” all-in-one, black primer optimizes and simplifies installation process

Replacing windcreens is now even simpler with BETAPRIME™ 5504G All-in-One “No-Shake” Primer. BETAPRIME™ 5504G can be used for priming both auto glass and cut bead. You can also use it on bare metal, paint and encapsulations, such as PUR, PVC and PAAS.

Saves time and money

BETAPRIME™ 5504G All-in-One “No-Shake” Primer eliminates the “shaking” step for a sure, easy and fast installation. It saves material costs and reduces installation time because you only need to buy and apply one product. Because BETAPRIME™ 5504G can be used on virtually all substrates, it can reduce costly mistakes, such as applying the wrong primer to the wrong part.

Other time-saving advantages include fast flash-off (dry) time that helps eliminate excessive waiting time following application.

Promotes strong, long-lasting bonds

Using an all-in-one primer is not a compromise. BETAPRIME™ 5504G has been tested in thousands of applications on a wide range of windcreens and with all BETASEAL™ adhesives. BETAPRIME™ 5504G All-in-One “No-Shake” Primer is black to provide excellent UV protection to the adhesive. This helps bonds last longer.

Easy-to-use: Clean, Prime and Bond

BETAPRIME™ 5504G All-in-One “No-Shake” Primer is part of a simple, superior system that includes BETACLEAN™ 3300 cleaner and all BETASEAL™ auto glass adhesives. Just three easy steps: clean, prime and bond.

Use in a wide range of temperatures and weather

Use in a wide range of temperatures and weather. Inclement weather is much less of a problem with BETAPRIME™ 5504G. It works in both cold and warm temperatures, -5°C to 40°C, making it the ideal system for mobile installations.
