

An element at
one with the sea.

Introducing **SEAMAXX**, the low-energy
seawater RO membrane.

SEAMAXX™ is desalination without oceans of energy.

With SEAMAXX™ RO elements, you will minimize your operating cost, reduce your capital costs and maximize your plant's efficiency.

The lowest energy solution

Lowest energy consumption – industry wide

17,000 gpd*. The optimized membrane chemistry minimizes pressure and energy consumption below any other existing SWRO product.

Water quality you need

99.70%*: Provides reliable long term permeate quality for single, double pass and interstaged systems.

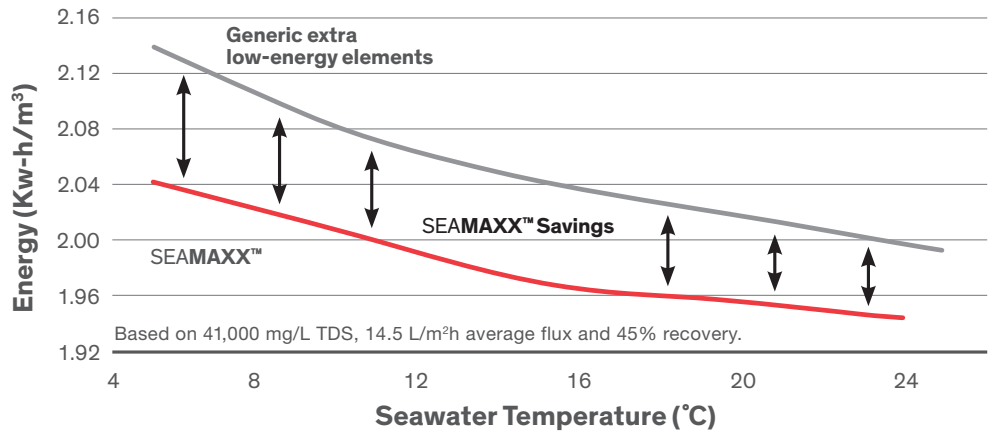

Optimized module design

The combination of **28 mil feed spacer** and **440ft² active membrane surface** and **iLEC™ interlocking technology** maximizes the productivity of your system at low differential pressure, low cleaning frequency and high cleaning efficiency.

*Standard Test Seawater Conditions: 32,000 mg/L, 25°C, 800 psi and 8% recovery.

Potential SEAMAXX Energy Savings vs. Generic Extra Low-Energy Elements
