Introducing SEAMAXX™, the low-energy seawater RO membrane.

An element at one with the sea.
**SEAMAXX™** is desalination without oceans of energy.

With **SEAMAXX™** RO elements, you will minimize your operating cost, reduce your capital costs and maximize your plant’s efficiency.

### The lowest energy solution

**Lowest energy consumption – industry wide**

17,000 gpd*: The optimized membrane chemistry minimizes pressure and energy consumption below any other existing SWRO product.

**Water quality you need**

99.70%*: Provides reliable long term permeate quality for single, double pass and interstaged systems.

**Optimized module design**

The combination of 28 mil feed spacer and 440 ft² active membrane surface and iLEC™ interlocking technology maximizes the productivity of your system at low differential pressure, low cleaning frequency and high cleaning efficiency.

*Standard Test Seawater Conditions: 32,000 mg/L, 25°C, 800 psi and 8% recovery.
