## USA FDA – Food Additive Status

### TapTec™ HP333 H Ion Exchange Resin

This resin is a completely hydrolyzed copolymer of acrylonitrile and trivinylcyclohexane. In accordance with the Food Contact Notification #006, effective March 17, 2000, this resin is cleared by the Food and Drug Administration as a Secondary Direct Food Additive under Title 21 of the Code of Federal Regulations (CFR), Part 173, section §173.25 for use in treating potable water.

Use of these products is subject to good manufacturing practices and any limitations which are part of the regulations. The regulations should be consulted for complete details.

Please be assured we are committed to providing high-quality products and service to our customers. If you have any questions or require further information, please contact us via our website at <http://dupont.com/water/contact-us>.

No freedom from infringement of any patent or trademark owned by DuPont or others is to be inferred. Because use conditions and applicable laws may differ from one location to another and may change with time, Customer is responsible for determining whether products and the information in this document are appropriate for Customer's use and for ensuring that Customer's workplace and disposal practices are in compliance with applicable laws and other government enactments. The product shown in this literature may not be available for sale and/or available in all geographies where DuPont is represented. The claims made may not have been approved for use in all countries. DuPont assumes no obligation or liability for the information in this document.
