

Realize enhanced weed control with flexibility to farm the way you want.

DuPont™
Instigate®
herbicide

DuPont™ Instigate® herbicide delivers:

- Enhanced weed control from two powerful active ingredients
- Application flexibility — preplant, at planting or early postemergence (up through V2)
- Tank-mix flexibility with your favorite preemergence corn herbicide to supercharge your weed-control program
- Use on minimum or no-till corn production, cross-spectrum burndown at planting, as well as for residual control on tough grasses and broadleaf weeds
- Application on herbicide-tolerant as well as non herbicide-tolerant corn hybrids
- A unique, low-rate dry formulation that does not require tanks, pumps or meters to handle and that is easy to measure and pour, mix and store

Instigate® at 5.25 oz/A + Breakfree® ATZ at 1.5 qt/A + Abundit® Extra at 1 qt/A sprayed at V1. Photo taken June 26, 2013 in Northern Barron County, Wis.

Rate recommendation

Instigate® 5.25–7.0 oz/A before crop emergence or 5.25–6.0 oz/A for early postemergence

For most soils and application situations the use rate is 6 oz/A

Application information

- Apply 14 days before planting and up through V2 corn (2 collars).
- For additional burndown and residual weed control tank mix with DuPont™ Cinch® ATZ or Breakfree® NXT ATZ herbicide.
- For control of emerged weeds add NIS or COC.
- When tank mixed with a glyphosate or glufosinate herbicide containing a built-in adjuvant system, no additional surfactant is required.
