

# Realize the full potential of your peanuts

DuPont™  
**Fontelis®**  
fungicide

## Peanut Recommendations

DuPont™ Fontelis® fungicide delivers broader-spectrum coverage for fast-acting and long-lasting protection that's preventive and curative. It's the power and flexibility you need to realize high-quality, high-yielding peanuts.†

### Key benefits of Fontelis®

- Broader spectrum coverage than any other product
  - Equally strong on early and late leaf spot — preventive *and* curative activity
  - Equally strong on foliar and soil-borne diseases
- Application flexibility — fits most irrigation programs — no need to 'water in'
- Excellent crop safety and the flexibility to safely mix with other crop inputs

† Not for use in California on peanuts.

### Seven years of trials\*, including 55 soil-borne and foliar disease studies, have shown:

- Fontelis® out yielded the grower standard\*\* 70% of the time
- Fontelis®-based programs averaged 382 more pounds of peanuts than standard fungicide disease programs
- At today's peanut prices, that extra yield means \$80.00 of extra value per acre

\* 2006–2012 DuPont™ Fontelis® peanut trials.

\*\* Standards include programs based on Abound, Artisan, Convoy, Headline, Provost or Tebuconazole products.

### DuPont™ Fontelis® fungicide

Active ingredient name: Penthiopyrad

Chemical class: FRAC Group 7, *carboxamides*

Formulation: 20 SC

## BETTER COVERAGE FOR BETTER DISEASE PROTECTION

**THREE MOVEMENT PROPERTIES** quickly surround, penetrate and protect leaves and stems

### Translaminar Movement

Moves through the leaf surface to protect top and bottom of the leaf

### Xylem Systemic Activity

Moves through plant tissues to distribute throughout the leaf

### Surface Redistribution

Redeposits to new plant surfaces during rainfall or irrigation events

**Fontelis® fungicide contains mineral oil in the formulation. If tank mixing with oil-sensitive products (for example, Captan and sulfur) read and follow their label restrictions. Always follow the tank-mix instructions of the product label that is most restrictive. The crop safety of all tank mixtures with Fontelis® which may include physically compatible pesticides, fertilizers, adjuvants and/or additives, has not been tested.**

### Maximum Residue Levels (MRLs)

DuPont™ Fontelis® fungicide is registered with the EPA and has received registrations in most states. DuPont is establishing MRLs in key countries of export to facilitate ease of trade for our customers. For updates to MRL status, please refer to the Global MRL Database ([globalmrl.com](http://globalmrl.com)). For any specific MRL-related questions on Fontelis® to support your crop export management decisions, please contact your local DuPont representative or email DuPont™ SmoothTrade™ Solutions at [SmoothTrade@dupont.com](mailto:SmoothTrade@dupont.com).

### For more information

Contact your local DuPont retailer or representative to get the power and flexibility you need to realize high-quality, high-yielding crops with DuPont™ Fontelis® fungicide. And visit us at [fontelis.dupont.com](http://fontelis.dupont.com).
