**Product Description**

Polymeric dielectric composition DuPont 5018G is a green UV curable, solvent less, screen printable composition used in encapsulant and crossover applications for both rigid and flexible circuit manufacture. It offers the advantages of rapid cure and excellent processing latitude while maintaining excellent electrical and physical properties after cure, including excellent crosshatch adhesion to print-treated and good adhesion to non-print-treated PET substrate and conductor. It is fully compatible with DuPont's 5000's Series conductor compositions.

**Product Benefits**
- Best insulating UV cure dielectric

**Processing**
- **Screen Printing Equipment**
  - Semiautomatic and manual
- **Substrates**
  - Polyester, polyimide, epoxy glass
- **Ink Residence Time on Screen**
  - > 2 hours
- **Screen Types**
  - Polyester, stainless steel
- **Optimum Cure Conditions for Flexibility**
  - 40 ft/min in air¹
  - 500 - 1500 mJ/cm²*
- **Typical Thickness (after cure) Printed with 200 - 280mesh stainless steel screen**
  - 1– 1.2 mil
Two prints of dielectric are strongly recommended to achieve maximum circuit reliability.

*Environmental Tests
  - Thermal Shock (+85°C to -40°C, 30 min. each, 5 cycles)
  - Dry Heat (+85°C, 10 days)
  - Humidity (+40°C, 95% RH, 10 days) [MIL Std 202E, method 103, cond. A]
  - Salt Spray (+35°C, 5% salt, 10 days) [ASTM B117]

Table 1 & 2 show anticipated typical physical properties for DuPont 5018G based on specific controlled experiments in our labs and are not intended to represent the product specifications, details of which are available upon request.

¹RPC Industries “QC” Processor Model 1202 AN, with the 200 W/in medium-pressure mercury vapor lamps. Since cure conditions govern characteristics, customers should establish the cure rate required to produce optimum combination of flexibility and hardness.

*0.500 - 1,500 joules using International Light IL.390B Light Bug or UV Process Supply

Storage and Shelf Life
Containers should be stored, tightly sealed, in a clean, stable environment at room temperature (<25°C). Shelf life of material in unopened containers is six months from date of shipment. Some settling of solids may occur and compositions should be thoroughly mixed prior to use. UV curable compositions such as DuPont 5018G should be stored away from heat and light.

Safety and Handling
For Safety and Handling information pertaining to this product, read the Material Safety Data Sheet (MSDS).
