Dear Customer,

RE: **Use Restrictions for AURUM® Resin**

Military Applications

In compliance with certain international accords, the Japanese Government's Foreign Exchange and Foreign Trade Law requires that exporters of certain Goods certify that such Goods will not be used for certain military applications. AURUM® thermoplastic polyimide resin is listed by the Japanese Government as such a Good. To comply with this export control, DuPont requires that all purchasers of AURUM® resin, in any form, certify that the resin will not be used for military applications and requests customers that purchase AURUM® to fill in a questionnaire to confirm end use and end user of the product.

Medical Applications

Additionally, DuPont requires that buyers of DuPont supplied products comply with DuPont policies regarding medical applications. DuPont requires the following certification to be completed by individuals duly authorized by their companies before DuPont accepts future purchase orders for AURUM® resin.

Please complete the attached form(s) and return them to:
